INVESTING IN THE FUTURE

At Manaksia Coated Metals & Industries Limited (MCMIL), we are engaged in the most progressive and transformative phase in our existence.

The Company is undertaking investments aligned with the evolving needs of a transforming world.

MCMIL is addressing concurrent priorities – scaling operations, deepening product integration and enhancing overall value.

The Company's focus on niche flat steel products promises higher returns over the prevailing industry average.

Its investments across the value chain — from raw material processing to energy generation — are directed at enhancing self-reliance and cost-efficiency.

This ongoing capacity expansion is expected to transform the Company's scale and visibility. In turn, it is expected to strengthen MCMIL's competitiveness and profitability.

When complete, this investment will empower MCMIL to emerge amongst larger companies in India's value-added flat steel segment, translating into sustainable growth.

PART 1

WHAT WE ARE AND WHAT WE DO

C O R P O R A T E S N A P S H O T

MANAKSIA COATED METALS & INDUSTRIES LIMITED IS EMERGING AS A STANDOUT PLAYER IN INDIA'S VALUE- ADDED FLAT STEEL SEGMENT.

The Company is a prominent manufacturer and exporter of quality galvanised and pre-painted steel in sheet and coil forms.

MCMIL's core operations are based out of an advanced steel facility in Kutch, Gujarat, established in 2006.

The Company delivers value-added flat steel products to a range of downstream sectors, including construction, appliances, general engineering, and other industrial cum domestic applications.

The Company's manufacturing operations are backed by advanced infrastructure, featuring a modern state-of-the-art continuous galvanising line and a continuous colour-coating line.

The Company is expanding its manufacturing capacity across its value chain while investing in renewable energy, reinforcing its commitment to become an environmentally responsible manufacturer .

Our mission

- Excellence in every process
- Innovation through advanced technology
- Empowerment of people and purpose
- Integrity in quality and delivery
- Efficiency in cost and operations
- Sustainability for long term impact
- Growth that's responsible and inclusive

Our vision

- Goodness in every action and decision
- Connection with people across boundaries
- Holistic growth for communities, stakeholders and industries.
- Contribution to India's manufacturing excellence.
- Progress rooted in purpose and responsibility
- Unity in values and impact
- Nation building through industrial advancement

Our core values

We are constantly driven by our core business values that serve as the pillars of our growth over time.

Team-oriented: We prioritise skill development and overall welfare of our internal stakeholders to help them sync individual goals with organisational objectives.

Quality excellence: With a combination of advanced production infrastructure, streamlined workflows and strategic decision-making, we strive to set newer, higher quality benchmarks.

Meeting commitments: Staying true to our business promises and commitments is of immense importance to us. At every point, we look to meet & surpass customer expectations.

Continuous learning: Through knowledge-sharing and resource utilisation, we constantly strive to become incrementally better every day.

Honesty and integrity: We follow a strong code of ethics at all times. Every action we take is powered by honesty, transparency and accountability.

Our background

Established in 2010 as an independent entity, MCMIL has emerged as a leading manufacturer and exporter of coated steel products. Over the years, the Company has significantly expanded its product portfolio and strengthened its presence across the domestic and international markets. MCMIL exports products to 44 countries, including key regions in Europe, Africa, and the Middle East, reinforcing its position as a global industry player.

Our manufacturing plants

To strengthen our pan-India supply network and enhance operational efficiency, MCMIL established strategically located manufacturing facilities, warehouses, and stockyards across the country.

Kutch plant: Our flagship manufacturing facility is located in Kutch and serves as the hub of

MCMIL's coated steel operations. The plant houses a state-of-the-art pre-painted steel line with an annual capacity of 86,000 MTPA and a fully automated galvanising line with a capacity of 132,000 MTPA. Both lines are equipped with advanced, high-precision machinery, delivering consistent, micron-level accuracy for premium-grade steel coils and sheets. Proximity to the Kandla and Mundra ports offers logistical advantages, enabling swift and cost-effective product distribution to the domestic and international markets.

Bhopal plant: Located in Madhya Pradesh, our Bhopal facility operates under a contract manufacturing arrangement with Reckitt Benckiser for the production of Ultramarine Blue Powder. This plant is extensively automated, requiring no manual intervention during the intermediate stages—from raw material unloading to final packaging—ensuring efficiency, safety, and consistent product quality.

Our products

The Company offers a comprehensive portfolio of value-added flat steel products, designed to address the diverse needs of industries such as construction, consumer appliances, and general engineering. At the core of its product range is Galvanised Steel (GI) and Pre-Painted Galvanised Steel (PPGI) in sheet and coil forms. These quality products are widely used in roofing, wall cladding, metal ceiling, ducting, structural components and

industrial fabrication processes on account of their superior finish, durability, and corrosion resistance.

The Company is investing in product innovation and technological upgrades. It has developed Alu-Zinc coated steel, a premium product popular for enhanced corrosion resistance, heat reflectivity, and extended service life. The application of this material is ideal for coastal regions, industrial zones, and high-

humidity environments where durability is crucial.

MCMIL manufactures FMCG products like industrial chemicals including ultramarine blue pigment, produced at dedicated Group facilities including the plant in Bhopal. This diverse, yet synergistic product range, reinforces MCMIL's reputation as a quality-driven, customer-focused company with strong capabilities in metals and consumer goods segments.

Our brands

To address market-specific needs and establish a strong brand identity, MCMIL introduced proprietary galvanised steel brands — 'Zingalvo' and 'Singham' — which are recognised for their strength, surface quality, and performance under harsh environmental conditions. Our brands are built around strength, durability, and aesthetic excellence, delivering superior quality and enduring value across applications.

ColourStrong – 'Go Long with Colour Strong!'

ColourStrong is MCMIL's flagship brand of premium pre-painted steel sheets. The brand is ISO 9001:2008-certified and known for vibrant, long-lasting colours and a superior surface finish. Designed to combine durability with visual appeal, ColourStrong brings a bold aesthetic dimension to modern architecture and infrastructure. Whether for roofing or cladding, the brand stands for strength with style - *Mazbooti Ka Rang, Humesha Aapke Sung.*

Zingalvo – Precision-Galvanised Steel

Zingalvo is MCMIL's brand for hot-dip galvanised steel products. Manufactured with high precision and tailored to customer specifications, Zingalvo offers excellent corrosion resistance and a superior surface finish, making it ideal for end-use applications and as a base for coating or painting.

Singham – Powered by Advanced Zinc Coating Technology

Singham represents MCMIL's high-strength Galvanised Corrugated (GC) Steel Sheets. Engineered to deliver exceptional durability at an affordable price, Singham is built to serve the everyday needs of millions. The brand's promise: superior value at a lower cost, offering dependable protection for homes, livelihoods, and aspirations.

Our fund raising

To fuel its growth, the Company secured a fresh equity infusion of Rs. 174.87 crores into the Company through two successful fund raises comprising a preferential allotment of warrants.

HOW OUR BUSINESS GENERATED ATTRACTIVE FINANCIAL GROWTH IN FY25

Revenue

(Rs. million)

Definition

It highlights the success of the Company's business process and vision, translating into revenues.

Why this is measured

It is an index that showcases the Company's ability to maximise revenues, which provides a basis against which the Company's success can be compared with sectoral peers.

What this means

Helps enhance incomes that, in turn, makes it possible to generate a surplus after meeting expenses.

Value impact

Aggregate revenue increased by 5.99% to Rs.7,908.665 million in FY 2024-25.

Profit after tax

(Rs. million)

Definition

Profit earned during the year after deducting all expenses and provisions.

Why this is measured

It highlights the strength of the business model in enhancing value for shareholders.

What this means

This ensures that the Company generates a sufficient profit to pay its shareholders and reinvest in business growth.

Value impact

The Company reported a 36.97% growth in profit after tax in FY 2024-25.

Profit after tax margin

(%)

Definition

It demonstrates the Company's ability to manage costs effectively, maintain pricing power, and generate value from its operations.

Why this is measured

The PAT margin indicates the Company's overall financial health and efficiency in converting revenues into actual profits available to shareholders.

What this means

A healthy PAT margin reflects strong bottom-line performance, enabling value creation for shareholders while providing the resources to fund growth and long-term sustainability.

Value impact

The Company reported a 2.00% profit after tax margin in FY 2024-25, which was 45 bps higher than the previous year.

EBITDA

(Rs. million)

Definition

Earnings before the deduction of interest, depreciation, extraordinary items and tax

Why this is measured

It is an index that showcases the Company's ability to generate a surplus after optimising operating costs, providing a base for comparison with sectoral peers.

What this means

Helps create a robust growth surplus generating engine that enhances reinvestment and debt servicing capability

Value impact

The Company's EBITDA for FY 2024-25 was Rs. 630.09 million, a 10.79% growth over the previous financial year.

EBITDA margin

(%)

**Definition**

EBITDA margin is a profitability measure to ascertain a company's operating efficiency.

Why this is measured

The EBITDA margin provides an idea of how much a company earns (before accounting for interest, depreciation, amortisation and taxes) on each rupee of sales.

What this means

This measure demonstrates the buffer in the business, which, when multiplied by scale, can potentially enhance the surplus.

Value impact

An increase in EBITDA margin by 36 basis points to 7.98% during the year signified stronger profitability driven by higher volumes, economies of scale, efficient working capital management, and a growing share of value-added products.

RoCE

(%)

**Definition**

This is a financial ratio that measures efficiency with which capital is employed in the Company's business.

Why this is measured

RoCE is an insightful metric to compare profitability across companies based on their respective capital efficiency.

What this means

Enhanced RoCE can potentially drive valuations and market perception.

Value impact

The Company reported an attractive RoCE during the year under review, reflecting its capacity to generate credible returns even during expansion phases.

Debt-to-Equity ratio

(x)

**Definition**

This is a financial metric compares a company's total liabilities to its shareholders' equity. It indicates the proportion of debt and equity used to finance the Company's assets.

Why this is measured

It helps assess the balance between borrowed funds and owners' capital, indicating the level of financial risk a company carries.

What this means

A prudent ratio suggests financial stability, while a high ratio may imply greater risk in meeting obligations, especially during downturns.

Value impact

The Company reported a debt-to-equity ratio of 1.79x in FY 2024-25, a decrease from 2.43x in FY 2023-24 following profit growth.

Net debt / EBITDA

(x)

**Definition**

The number of times the Company's EBITDA can be used to repay debt.

Why this is measured

It is a key measure of debt-servicing ability, showing whether operating cash flows are sufficient to meet repayment obligations.

What this means

A lower ratio reflects stronger financial flexibility and creditworthiness, whereas a higher ratio signals potential stress in managing debt levels.

Value impact

The Company reported a Net Debt: EBITDA of 1.85x in FY 2024-25, a decrease from 2.74x in FY 2023-24 following profit growth.

PART 2

WHERE WE ARE AND WHERE WE SEEK TO GO

3 PHASES OF OUR EXPANSION PROGRAMME

PHASE
1

Transforming GI to Alu-Zinc steel and increasing our capacity from 132,000 MTPA to 180,000 MTPA;
7 MW captive solar power plant;
Investment in a 48,000 MTPA coil slitting line.

PHASE
2

New 150,000 MTPA pre-painted steel line.

PHASE
3

A 300,000 MTPA cold rolling mill;
200,000 MTPA new Alu-Zinc coating line.

What shareholders can expect across the foreseeable future

FY26: Completion of Phases 1 and 2

FY27/28: Commencement of Phase 3

GI : Galvanised iron, steel coated with a thin layer of zinc

ALU-ZINC: Alu-Zinc refers to an alloy of zinc and aluminium for better corrosion resistance

5 WAYS WE ARE TRANSFORMING OUR COMPANY

1

Deeper presence in value-added flat steel products
Intended to protect from commodity market cycles

2

Consistent rise in manufacturing capacity
Intended to generate superior economies and become future-ready

3

Technology upgrade from galvanising to Alu-Zinc with a capacity expansion to 1,80,000 MTPA and a second pre-painted steel line of 150,000 MTPA
Superior quality product marked by 3x corrosion resistance (Alu-Zinc)

4

Commissioning of a captive solar power plant of 7MW
Enhanced cost efficiency, lower power grid dependence, and a lower carbon footprint

5

Net worth-driven capacity growth
Intended to create a Balance Sheet foundation for sustainable value-enhancing growth

1 The Company is addressing Phase 2 of its capacity expansion, creating the platform for sustainable growth with a probable backward integration and value-added capacity expansion across the foreseeable future

2 The Company committed to invest an estimated Rs.140 Cr in Phases 1 and 2, accounting for 75.43% of its pre-expansion gross block

3 The Company achieved the financial closure for Phase 1; financial closure for Phase 2 is in progress.

OUR MOMENT HAS ARRIVED

MCMIL is engaged
in reinventing its
personality

4 The Company engaged with equipment suppliers for scheduled deliveries and timely capacity commissioning in FY 26

5 The Company engaged with customers for their enhanced product needs that could be serviced following the expansion

6 The Company deepened shopfloor training and talent retention

7 The Company consolidated the number of lenders (short-term debt) to achieve a lower average borrowing cost

8 The Company deepened its governance commitment as a foundation for sustainable multi-year growth

THE FOUNDATION OF OUR BUSINESS MODEL

Our model is being directed to enhance stakeholder value

Futuristic: Investment in products integral to modern living and addressing demanding customer preferences for enhanced quality

Banking on national policy: Investment in products aligned to the Indian economic growth story and the Indian consumption growth story

Global cum Indian: The Company's growing presence across diverse markets will further moderate an excessive dependence on any one geography (leveraging the Company's port proximity)

Integration: The Company plans to extend its value-chain from the manufacture of cold rolled steel to Alu-Zinc and pre-painted steel

Value-added segments: The Company's focus on value-added steel will address opportunities that are integrated deeper into customer needs

Increased SKUs: The Company will widen its portfolio, deepening its positioning as a Alu-Zinc / pre-painted steel one-stop solution provider

Service mindset: The Company will widen its customer reach by servicing any-volume customer needs complemented by increased dispatch frequency

Latest technologies: The Company is investing in advanced digital manufacturing equipment and Level 3 automation – CRM software and AI-driven.

Relationship-driven: The Company will deepen engagements with prominent OEMs for their ongoing needs of value-added pre-painted steel

Low gearing: The Company possesses negligible long-term debt; the equity infusion could ensure that growth is net worth-driven from this point

Growing presence as a flat steel player in India

Emerged as a larger national cum international player

Higher capacity in servicing on-time in-full customer needs

Enhanced loyalty to unlock higher customer value

Enhanced ability to capitalise on a positive product cycle across the long-term

**WHEN ALL CAPACITY
EXPANSIONS ARE COMPLETE,
YOUR COMPANY IS EXPECTED
TO TREBLE ITS REVENUE SIZE
AND EMERGE AS ONE OF THE
FASTEST GROWING VALUE-
ADDED FLAT STEEL PLAYERS
IN INDIA**

Overview

The big message is that Manaksia Coated is at an inflection point.

During the last financial year, your Company reported profitable growth, validating the attractiveness of its chosen operating segments. Revenues increased 5.99%, while EBITDA strengthened 10.79% and profit after tax rose 36.97%. This validated your Company's selection of its operating segment, distinct from commoditised flat steel segments. This segment afforded rising profitability coupled with increasing revenues. I am pleased to communicate that our exports increased 26.92% to Rs.306.39 cr, accounting for 39.20% of your Company's revenues in FY 25, validating the international competitiveness of your Company's operations.

During the year under review, your Company strengthened its financial hygiene, indicating the beginning of a structural shift towards value-addition. Your Company strengthened its debt-equity ratio from 2.43 to 1.79, interest coverage ratio from 1.74 to 1.89, and net profit margin by 45 bps to 2%. These improvements were incremental but irreversible, laying the ground for a sustained improvement across the foreseeable future. Your Company strengthened its financial foundation to generate the next round of growth through a net worth infusion of Rs.58.99 Cr during the year under review.

The improved financial outcome in FY 25 was the result of an appreciable increase in the production of value-added flat steel products. Your Company's galvanised steel coils production increased by 20.62%,

providing your Company with a wider value-added products base. The production of pre-painted steel coils increased 21.99% to 74,119 tonnes; exports increased 27.81% to 35,837 tonnes. I am pleased to communicate that the growth in each of these segments was higher than the overall growth of the country's steel industry during the last financial year, validating our outperformance.

India's economic growth story

Your Company's growth was in line with the increased optimism coming out of India's economic growth journey.

One, India is the fourth largest economy with a per capita consumption of consumer products that is still below the global average. At our Company, we see this aberration correcting faster than ever. When this transpires, there could be a sharper increase in the consumption of core products, steel – flat steel especially – being among the most prominent.

Two, India retained its position as the fastest growing global economy during the last financial year. The country grew at 6.5%, emerging as a decisive co-driver of the global economy. This is expected to accelerate the offtake of steel consumption – not merely as a beneficiary of the economic growth but also as a catalyst.

Three, in 2024-25, India crossed a subtle but significant economic threshold — one that, in hindsight, may well be seen as an inflection point for India's consumer story. India's per capita income crossed

the US\$ 2,500 mark. The global consumption history suggests that US\$ 2,500 in per capita income represents a tipping point — China in the early 2000s, Vietnam post 2017 and Indonesia a decade ago — followed by a structural shift in consumer spending patterns.

Four, India's Union Budget outlay for infrastructure – rising from Rs.4,12,085 crore for 2020-21 to Rs.11,21,090 crore for 2025-26 – has accelerated the offtake for cement, steel and equipment, which, in turn, have catalysed income and consumption spending.

Consistent investment

At Manaksia Coated, we recognised the significant growth potential within our industry and proactively responded by making strategic investments.

We widened our product portfolio to meet evolving market needs, introducing innovative coating solutions that add value and differentiation – broadbasing our value chain.

To support these advancements, disciplined capacity expansions were undertaken, enabling us to scale production while protecting - our overall capital efficiency.

Recognising the importance of talent, we invested in hiring and upskilling our workforce, fostering a culture of excellence and continuous improvement.

While embracing the latest technologies, we upgraded our manufacturing processes and integrated advanced control systems

Our Phase 1 capacity expansion will be completed in FY 26 and comprises the transformation of GI to Alu-Zinc, while increasing the manufacturing capacity to 180,000 MTPA. It also comprises a captive 7MW solar power plant and investment in a coil slitting line.

to ensure precision, consistency, and operational efficiency.

These comprehensive investments underpinned our growth strategy, allowing us to build a robust, future-ready organisation capable of sustaining long-term success and delivering value to our stakeholders.

Capitalising on a transforming India

At our Company, we see a growing transformation in flat steel preferences across India.

There is a growing traction for pre-engineered buildings in the country, secured by multi-decade warranties. As a future-facing company, we manufacture products used in the fabrication of these pre-engineered buildings.

As India's infrastructure, commercial, industrial, and logistics sectors scale rapidly, pre engineered buildings are

evolving from an alternative model into the mainstream standard for efficient and modern construction. This is widening the market for our products. Besides, your Company is engaged in the manufacture of another value-added product in India's flat steel segment – Alu-Zinc steel – where demand is growing with speed and the market comprises only select manufacturers.

This industry reality has created an attractive opportunity for prominent producers of value-added steel products like our Company. These focused players—your Company being one—have graduated a material product into a service by responding to demanding customer needs with quality-intensive solutions. There is a widening room for players like us; the Indian market for Alu-Zinc steel is estimated to grow 15% (or twice the national GDP growth rate).

The bottom line is that select flat steel segments like Alu-Zinc represent

a sustainable long-term growth opportunity. This space is growing faster than most steel segments; demand exceeds supply across India; it provides room for attractive value addition; the consumer is willing to pay a higher price for superior features.

Consistent growth

Your Company is doing more than merely invest; it is creating a robust foundation for sustainable growth. your Company prudently staggered its investment across phases to respond to the emerging national growth opportunity.

Our Phase 1 capacity expansion will be completed in FY 26 and comprises the transformation of GI to Alu-Zinc, while increasing the Alu-Zinc manufacturing capacity to 180,000 MTPA. It also comprises a captive 7MW solar power plant and investment in a coil slitting line. The subsequent Phases 2 and 3 comprise a new pre-

painted steel line of an additional 150,000 MTPA capacity, cold rolling mill (backward integration) of 300,000 MTPA capacity, and a second Alu-Zinc coating line of 200,000 MTPA capacity. The result is that in the space of two to three years, your Company will have increased its aggregate manufacturing capacity (tonnage) by around 300% – from 108,000 MTPA to 300,000 MTPA across all products.

Preparing for growth

During the year under review, your Company completed two fund-raising initiatives through the allotment of warrants and equity shares. This helped right-size and right-balance your Company's fundamentals for sustainable growth.

The phasewise capacity expansion is expected to transform our Company's position, performance and prospects. Following the completion of Phase 2 during the current financial year, your Company will be positioned to

generate an approximate 50% revenue growth year-on-year. This growth will be sustained through subsequent investments, the full impact of which is likely to be reflected in our revenues across the coming years.

Your Company will manufacture advanced flat steel products, marked by considerably superior corrosion resistance with wider downstream applications. This segment – generally preferred by OEMs – is marked by limited competition and offers enhanced margins.

Outcome

When all our investments have been completed, your Company expects to treble its revenue size from what was achieved in FY 25 and emerge as one of the fastest growing value-added flat steel players in India, enhancing value for all its stakeholders.

**WE REMAIN
DEDICATED TO
INVESTING IN
OUR FUTURE,
REINFORCING
OUR LONG-TERM
STRATEGIC VISION**

Overview

Manaksia Coated Metals and Industries Limited (MCMIL) is investing in the future through forward-thinking initiatives and strategic decisions. Your Company's commitment to growth and sustainability is evident through several key areas of investment and development.

First and foremost, MCMIL is focusing on value-added flat steel products. By deepening its presence in this specialised segment, your Company aims to protect itself from the unpredictable cycles of commodity markets. This strategic emphasis not only sets MCMIL apart from competitors but also showcases its commitment to long-term stability. The production of niche products allows for higher margins and reduced vulnerability to price volatility, which can significantly impact financial performance. By focusing on this specialisation, Manaksia Coated is not merely reacting to existing market conditions but is proactively shaping its future through a robust product portfolio addressing specific customer needs.

In addition to its specialised focus, MCMIL is deepening manufacturing investments. This is intended to generate superior economies of scale, enabling your Company to operate more efficiently while meeting rising demand. Expanding production capabilities is essential in a competitive market where customer expectations continue to evolve. By investing in modern equipment, cutting-edge manufacturing technologies, and optimised processes, MCMIL is expected to remain agile and adaptable. This foresight ensures that your Company remains prepared for opportunities and can respond with speed to market changes.

Another cornerstone of MCMIL's investment strategy lies in its capacity growth without incurring long-term debt. Your Company mobilised Rs.35 Crore to fund its capacity expansions and right-

size its Balance Sheet. This financial prudence establishes a foundation for sustainable value-enhancing growth. By maintaining a healthy Balance Sheet, your Company not only possesses a credible financial position but also enhances investor confidence. Potential stakeholders are often inclined to support a company that relies on its operational efficiency and cash flow generation instead of excessive borrowing. This responsible approach to financing underpins Manaksia Coated's capacity to invest in net worth-driven expansion.

International expansion represents another pivotal aspect of your Company's investment strategy. The consistent growth of its international presence is a testament to its ambition to broaden its market footprint and diversify revenue sources. By reducing its dependence on the domestic market, your Company is derisking its business. This strategy is relevant in an unpredictable global economy where external factors can influence demand rapidly. As your Company widens its international network, it will capitalise on emerging markets and gain access to a wider array of customers. This approach will not only widen revenue streams but also reinforce your Company's global reputation.

Manaksia Coated's investments can be seen as a commitment to innovation and sustainability. Your Company recognises the growing importance of environmentally friendly practices in manufacturing. By investing in 7 MW of captive solar energy generation, green technologies and processes, MCMIL is ensuring a compliance with regulatory standards while appealing to environmentally conscious consumers. This forward-thinking approach to sustainability encapsulates the principles of responsible corporate citizenship and reflects a broader market trend where consumers increasingly patronise businesses that prioritise environmental stewardship.

Workforce training and development is another critical area where

your Company is investing for the future. By prioritising employee skill development and creating a culture of continuous learning, your Company is enhancing its operational efficiency and workforce capability. A skilled workforce is not only vital for maintaining high quality standards but also plays an integral role in driving innovation within our Company. When employees are empowered with knowledge, they are more likely to contribute ideas and improvements that take our business ahead.

Your Company's commitment to research and development (R&D) emphasises its strategic investment in future growth. By allocating resources to R&D, your Company can discover more efficient manufacturing processes, develop new products, and improve existing offerings. This investment in innovation is critical to staying ahead of competitors and meeting the evolving needs of customers. As technologies progress and market demands shift, continuous R&D will ensure that your Company remains relevant and adapting to change.

In conclusion, MCMIL is making significant investments across various business dimensions to secure a sustainable future. From focusing on select value-added products to expanding its manufacturing capacity and developing a robust financial foundation, each initiative demonstrates your Company's commitment to sustainable growth.

By enhancing its international presence and investing in innovation, training, and development, MCMIL is positioning itself as a forward-thinking player in the coated metals segment.

Through these future-facing investments, your Company is not only preparing to navigate the challenges of tomorrow but is also laying the groundwork for success in an ever-evolving market landscape today.

GROWTH JOURNEY**

We invested in our business
and created a new growth
foundation in FY 25

Mahendra Bang
Chief Financial Officer

Big picture: At Manaksia Coated, the overarching message is that your Company is about to enter a new orbit in its existence. This new personality will be marked by consistently sustainable growth that evolves your Company into a prominent value-added flat steel products manufacturer across the foreseeable future. The combination of scale (more than doubled capacity) and scope (value-addition) represents volume and value imperatives that could

empower your Company to enhance significant stakeholder value across the foreseeable future.

Performance foundation: Your Company reported a revenue growth of 5.99%, EBITDA growth of 10.79%, PAT growth of 36.97% and the financial closure of its Phase 1 expansion programme during the year under review. Your Company completed crucial fund-raising initiatives through the allotment

of warrants and equity shares, strengthening its Balance Sheet. The commissioning of Phase 2 could generate superior financial upsides from the third quarter of the current financial year, the proceeds of which could help your Company part-fund Phase 3. This investment programme is expected to sustain a consistency in enhancing your Company's revenues, margins and profits across the foreseeable future.

Year	FY23	FY24	FY25
Profit after tax (Rs. cr)	9.36	11.55	15.84
EPS (Rs)	1.43	1.67	2.07
Book value (Rs)	18.20	19.69	24.58

Expansion programmes: Your Company's growth blueprint is being driven through its phased expansion programmes. When the phases are complete, your Company is expected to sustain its growth even on a larger base. The proposed expansions are expected to generate the following upsides: enhanced market visibility, enhanced ability to comprehensively service customer needs, economies of scale and value-addition. The combination of these realities is expected to transform your Company's financials and stakeholder value.

It is imperative that this unprecedented expansion comprise a prudent gearing structure (balance of debt and net worth), right cost of blended capital and an extended debt repayment tenure. Your Company will be required to address the challenges

of the day, comprising timely commissioning, containing project cost estimates, inflation, interest rate movements and multi-country currency challenges, protecting the product price-value proposition and safeguarding liquidity.

The Rs.45 Cr Alu-Zinc upgradation project was funded through a balanced mix of equity, earnings and term loans from Indian banks (India EXIM Bank). Net worth accounted for 503.78% of project funding, indicating a low project risk. The tenure of long-term debt of 84 months provides your Company with a patient financial resource. Nearly 100% of the debt was raised in Indian rupees.

By funding a major part of our capital expenditure (both phases) through net worth, we have created

a robust foundation for sustainable growth, higher margins cum liquidity, higher surplus reinvestment and an enhanced sustainable surplus – a virtuous value-enhancing engine.

Profitable growth: By increasing the manufacturing capacity of value-added steel, widening product integration (enhancing value-addition) and moderating the role of debt in our expansions, we are seeding the business for profitable growth (where profit growth in percentage terms could be higher than the revenue growth in percentage terms). It would be relevant to indicate that your Company reported 5.99% revenue growth and 36.97% PAT increase in FY 25, validating its commitment to profitable growth.

Year	FY23	FY24	FY25
Revenue growth %	1.00	13.51	5.99
EBITDA growth %	-12.14	49.19	10.79
PAT growth %	8.51	23.40	36.97

Rating: It will be imperative to enhance the perception of our Company as appraised by credit rating agencies. Your Company's credit rating was upgraded from BBB+ to A- for long-term borrowings as appraised by ACUITE during the last financial year; the rating for short-term borrowings was enhanced from

A2 to A2+ by ACUITE. This credible rating validates your Company's performance and prospects; it has enhanced your Company's credibility in the international markets; it could grant access to lower cost borrowings. We believe that the commissioning of our Phase 2 expansion and a correspondingly lower debt-equity

ratio will only strengthen our credit rating across the foreseeable future with positive spin-offs: lower-cost debt across possibly longer tenures, ability to recruit front line talent and potentially enhance our market valuation.

Year	FY24	FY25
Credit rating (long-term borrowings)	BBB+	A-

Capital efficiency: We believe that the key to growth lies in how well we utilise every rupee invested in our business. The more effectively we do so, the better our RoCE and the bigger our capacity to reinvest earnings in growing your Company bigger, better and faster. In view of this, our priority lies in all the initiatives that enhance our capital efficiency – capital allocation discipline towards flat steel products fetching the highest value-addition, timely projects commissioning, eliminating cost overruns, mobilising low cost debt, generating procurement economies, widening the value chain across

interlinked products, leveraging our port proximity to enhance exports, enhancing the captive generation of renewable energy, increasing the proportion of revenues from OEM sales where realisations could be higher, enhancing working capital hygiene (lower inventories and receivables) and selling in low supply markets.

Your Company reported creditable profitability during the year under review. EBITDA margin strengthened 36 bps to 7.98%, which was a reflection of an improvement in volumes, economies, working capital

management and a larger proportion of value-added products. Return on Capital Employed moderated -60 bps to 8.52% as additional resource mobilisation towards the end of the financial year and corresponding investments were yet to translate into enhanced production and superior earnings.

We believe that the expansions should enhance our RoCE, initiating a virtuous profitability cycle in our business. The numbers will progressively improve as the capital investments achieve a higher utilisation, strengthening an overall capital efficiency.

Year	FY23	FY24	FY25
Return on Capital Employed %	8.02	9.12	8.52
Return on Equity %	7.85	7.37	6.79

Revenues: Your Company expects to keep growing revenues higher than the growth rate of the Indian steel industry. During the last financial year, the Indian crude steel production grew around 6%; your Company grew its galvanised steel coils production around 21%, pre-painted steel coils production around 22%, overall sales volume around 14% and export revenues around 27%. This indicates a prudent choice of value-added flat steel sector segments, affording demand and margins clarity.

Your Company is positioned as an international flat steel producer located out of India, thanks to the major ports of Kandla and Mundra located 50 Kms from its Gujarat plant. Your Company serviced the growing demand of customers across 44 countries during the last financial year. Around 39.20% of your Company's revenue was derived from exports in FY 25, a reflection of its growing competence in being able to service a global market with a timely supply of quality material. Your Company's expansion is expected to enhance the confidence of our long-term

international OEM buyers about our supply sustainability.

Your Company sustained its focus on brand-influenced sales. Your Company's galvanised steel sheets and coils were sold under the Zingalvo and Singham brands; the pre-painted steel sheets and coils were marketed under the Colour Strong brand.

It would be relevant to indicate that the proportion of pre-painted steel products in your Company's revenue mix increased substantially in the last few years, indicating its focus on value-added products.

Year	FY23	FY24	FY25
Revenues (Rs. cr)	651.84	739.65	781.63
% of overall revenues derived from pre-painted steel coils	67.29	69.03	74.50

Year	FY23	FY24	FY25
Exports (Rs. cr)	138.87	241.43	306.39
Exports as a % of total revenues	21.55	32.64	39.20

Margins: During the last financial year, our EBITDA margin strengthened following a consistent focus on value-added products coupled with stringent working capital management. The improved margins also represented a validation of our volume- $\bar{\text{cum}}$ value-

driven approach, and product-based costing (moderating value-added flat metal manufacturing costs down to one of the lowest in India). Going ahead, your Company will endeavour to enhance margins by more than 300 bps by the time its subsequent

expansions have been completed, resulting in an enhanced proportion of revenues being derived from value-added products like pre-painted and Alu-Zinc steels.

As on 31 st March	FY23	FY24	FY25
EBITDA margin %	5.80	7.62	7.98
Exports as a % of total revenues	21.55	32.64	39.20

Liquidity: As a policy, we will maximise the use of accruals in our growth, moderating the use of borrowed funds in commissioning new projects. We have seen that this has worked best: the prudent use of moderately priced debt in working capital has inspired us to perform better and left us with adequate net worth to fund business growth. We have enhanced our liquidity through successive net worth infusions (from external institutions and the promoters), reflected visibly in a

decline in our overall debt-equity ratio.

Your Company repaid Rs.35.80 Cr of overall debt during the last financial year even as it invested Rs.21.71 Cr in brownfield expansion projects. Your Company aggregated a sizable net worth resource to fund capacity expansion and sustain working capital liquidity.

Going ahead, your Company will focus on enhanced liquidity through a lower role of overall debt in growing the business, larger proportion of

revenues from value-added flat steel products and stronger trade terms. Your Company will continue to prioritise the efficient use of working capital following the expansion. This is expected to enhance interest cover, a measure of liquidity.

Overall, your Company will attempt to enhance its working capital efficiency by working with a lower inventory (just-in-time) and receivables. This could enhance liquidity (measured by a higher interest cover, lower gearing and a lower Net debt/EBITDA) and profitability.

Year	FY23	FY24	FY25
Cash and cash equivalents (Rs.cr)	20.12	22.02	25.06
Interest cover (x)	1.54	1.46	1.62

Value-added realisations: Your Company is committed to enhance average per tonnage realisations of its product mix. This is expected to transpire following an increased proportion of revenues being

derived from Alu-Zinc coated steel and pre-painted steel across the future. The increased realisation is expected to create a foundation of value-added flat metal, enhancing capital efficiency, surplus generation

and reinvestment – a virtuous cycle. Your Company will seek to maximise its proportion of revenues from the highest value-added products across the foreseeable future.

Year	FY23	FY24	FY25
EBITDA per tonne (Rs)	5,122	6,326	6,157

Debt management: The Company's total debt (related to existing operations and not counting the expansion) declined from Rs.178.08 Cr to Rs.118.23 cr; long-term debt declined from Rs.65.48 Cr to Rs.50.92 cr, indicating the increasingly net worth-driven nature of the business even as your Company was at the cusp of commissioning Phase 2 of its expansion programme. Concurrently, your Company's net worth strengthened from Rs.119.25 Cr to Rs.152.37 Cr during the last financial year; gearing strengthened from 2.48 in FY 2023-24 to 1.81 in FY 2024-25 as your Company grew net worth on the one hand (following equity infusion and increased profits) and

pared long-term debt (repayment). By the virtue of investing in the manufacture of products with better traction, your Company expects to repay short-term debt with speed. This is likely to create a structural shift: a long-term foundation of net worth-driven growth, enhancing the overall viability of the business.

The cost of debt on your Company's books was 7.94% during the year under review (8.51% in the previous year), which we consider reasonable. This preference for net worth could be reinforced yet again to fund subsequent expansions, right-balancing your Company's fundamentals and setting the

ground for sustained net worth-driven expansion. Your Company consolidated its debt lenders from 8 to 5 with the objective of deepening its banker relationships, enhancing mobilisation stability cum negotiation leverage and moderating the cost of funds.

Your Company expects that net worth will account for a larger part of its total capital expenditure from this point onwards, which is expected to maximise the role of earnings (and net worth mobilisation if needed) in reinvestments. In turn, this is expected to scale the business faster and more profitably from the current year onwards.

Year	FY23	FY24	FY25
Debt repaid (Rs.cr)	13.51	38.81	17.42
Total debt (Rs.cr)	102.11	102.99	94.83

Year	FY23	FY24	FY25
Debt-equity ratio	3.47	2.43	1.79

Way forward: The corporation enjoyed an improved financial position at the end of the fiscal year under review. Your Company's net worth stood at Rs.226.70 crore as on 31st March 2025, with declining long-term debt and Rs.75.59 crore in short-term debt. We foresee a transformation in your Company's fundamentals starting the current financial year following the commissioning of Phase 2. This commissioning is expected to build on the growing acceptability of value-added flat steel products (pre-painted steel and Alu-Zinc steel) – enhancing volume and value.

During the current financial year, your Company commissioned the increase in pre-painted steel cum Alu-Zinc steel capacities; the second line of the pre-painted steel capacity will balance the downstream processing capability with upstream manufacturing capacity.

During the current financial year, your Company intends to commission around 7 MW of renewable energy. This will moderate your Company's dependence on the state electricity grid, enhance power reliability cum quality in addition to moderating the overall energy cost per unit of generated power. The Rs.31 Cr investment in renewable energy is expected to be recovered in around three-and-a-half years; it will address 53% of your Company's energy needs; it will provide your Company with accelerated depreciation benefits and also moderate power cost per unit by around 35-45%. This investment is expected to enhance your Company's positioning as a green steel maker committed to moderate its carbon footprint.

During the next financial year (FY 27), your Company expects to benefit

from yet another capacity expansion. The risk to these prospects comprise increased competition, economic slowdown, increase in interest rates (affecting the offtake of consumer durables that consume flat steel) and lower disposable incomes. Your Company has taken proactive measures to moderate the impact of these risks.

The Company is optimistic of its prospects because the value-added flat steel segments are growing at around 15% per year; the potential for the Company's products is widening, marked by scope for smaller (but more flexible) flat steel players like your Company that can customise products and services.

PART 4

WHY WE ARE INVESTING IN VALUE-ADDED PRODUCTS THAT ARE GROWING RAPIDLY

THE MARKET FOR PRE-PAINTED STEEL AND ALU-ZINC STEEL HAS TOUCHED AN INFLECTION POINT

These are some of the reasons why

Overview

Pre-painted Alu-Zinc steel suppliers in India who invest in customised product offerings, design flexibility, and proactive service support are positioned to capture a substantial share in infrastructure, construction, and appliance sectors — and ride the wave of India's rising demand for premium and personalised flat metal solutions.

Rising demand for aesthetics and custom finishes

Architects, developers, appliance manufacturers are increasingly seeking customised colours, textures, and coating functionalities—such as heat-reflective, anti-fingerprint, or low-VOC finishes. Manufacturers offering mass customisation, digital-print personalisation or decorative embossing are seeing superior demand.

Construction growth and architectural flexibility

Pre-painted sheets are widely used in facades, roofing, insulated sandwich panels, cladding, and modular construction. As urbanisation accelerates, customers seek unique design themes and speedy turnarounds, making manufacturers with flexible fabrication lines and custom-cut capabilities increasingly indispensable.

Growth in appliance and white goods sectors

Pre-painted Alu-Zinc steel finds applications in appliance casings, and HVAC components and bus body panels, amongst others. OEMs now demand brand-specific finishes and durable coatings,

creating a space for manufacturers offering bespoke surface engineering, consistent quality, and shorter lead times.

Sustainability and performance-oriented solutions

Demand for eco-friendly, recyclable, shiny appearance (solar-reflective), usability and corrosion-resistant materials is on the rise. Manufacturers who provide customisable coatings with low VOC emissions or reflectivity benefits help clients qualify for green building certifications and meet regulatory standards. There has been a progressive shift from the use of powder coated steel to pre-painted steel for reasons of enhanced automation-driven efficiency, improved quality, superior price-value proposition and eco-friendliness.

Importance of superior service and support

The pre-painted metal market is evolving toward servicing, logistics, after-sales, and customisation support—not just material supply. Companies offering just-in-time delivery, technical guidance, and customised packaging stand out in a segment where customers expect design-led service.

Specific opportunities in India

India's pre-painted Alu-Zinc steel segment is projected to grow strongly, driven by a growing demand from sectors like construction and affordable housing, as well as a rising demand for quality long-lasting products.

STRATEGIC RELEVANCE

OUR COMPANY IS EMERGING AS A PROMINENT PLAYER IN THE INDIAN FLAT STEEL SECTOR

Overview

Flat steel acts as the backbone of infrastructure and industry—fuelling construction, appliances, and urban expansion in tandem with economic development. This reflects its utility across sectors shaping GDP growth.

Flat steel—hot rolled coils, cold rolled coils, galvanised and colour-coated sheets—is core to high-impact national sectors like construction, bus bodies, consumer appliances, and infrastructure. These applications alone account for an estimated 50% of India's total steel consumption.

As India invests trillions in roads, ports, smart cities, and metro rail, demand for flat rolled steel sheets and coils becomes a direct indicator of infrastructure momentum and macroeconomic vitality.

India's increased infrastructure outlay increase will translate into the construction of highways, housing, airports, rails, and smart cities, strengthening the demand for flat steel. Every tonne of flat steel consumed resonates through manufacturing, employment, logistics, and supply chains—making flat steel consumption a potent economic multiplier.

Flat steel demand consistently outpaces GDP growth in emerging economies—highlighting how rising urbanisation, industry, and exports amplify its role as a growth barometer. Surging flat steel usage in solar energy infrastructure, pipeline, HVAC equipment, refrigeration, metal ceiling systems, dry wall partition systems and pharma clean rooms reflects a deeper industrial transition — graduating India from a resource-based to a manufacturing cum consumption-led economy.

In effect, tracking flat steel—a subset of finished steel output—provides a granular, high-frequency snapshot of India's economic trajectory and industrial health.

Since our Company's exports are rising we are bringing in forex into the country and helping make India a prominent player in the global steel industry.

Steel demand outpacing GDP growth

Between 2019–2024, India's steel output surged 33%, even as global production declined 1%—a pattern underscoring India's resilience and structural growth in steel consumption. Historically, Indian steel consumption has grown at a CAGR of 7–8%, exceeding nominal GDP growth by a factor of 1.1–1.3x, revealing a strong elasticity between steel use and economic expansion.

Flat steel as a growth marker

Flat steel lies at the heart of manufacturing: it fuels bus body panels, appliance casings, industrial machinery components, and construction fittings. With India transitioning into a manufacturing and consumption-driven economy, flat steel consumption mirrors higher industrial activity, urban housing growth, and emerging middle-class lifestyles.

Policy backing and sectoral investment

India's strategic initiatives—like the National Infrastructure Pipeline, PLI schemes for specialty steel, affordable housing projects, and smart city development—are boosting infrastructure and industrial expansion, catalysing flat steel demand.

Why flat steel reflects India's growth trajectory

Infrastructural pulse: Flat steel use is closely aligned with construction, urbanisation, and industrial builds.

Elastic growth: Steel demand grows faster than GDP, amplifying economic expansion.

Diversified consumption: Broad usage across manufacturing, mobility, appliances, and real estate sectors.

Strategic leverage: Acts as an enabler and gauge of government policy and industrial momentum.

Big numbers

~107

Kg, India's per capita steel consumption, FY 24

~219

Kg, global per capita steel consumption, FY 24

(Source: worldsteel.org.)

INDIA IS AT A POINT OF STEEL CONSUMPTION TAKE-OFF

India's steel consumption per capita grew sharply from ~64 Kg in 2020 to ~107 Kg in 2024–25, indicating the country's seriousness in catching up with the global average.

India's infrastructure development, rapid urbanisation, and industrial expansion suggest steel consumption could keep climbing — closer to the government's long term target of ~160 Kg per capita by 2030.

This indicates that growth that has taken decades could now transpire in a fraction of the time – across just the next five years.

This indicates the country is possibly entering a golden age in terms of steel manufacturing, consumption and export.

PRODUCT FEATURES

CUSTOMERS ARE INCREASINGLY TURNING TO PRE-PAINTED ALU-ZINC STEEL FOR ITS ADVANCED FEATURES

Overview

Pre-painted Alu-Zinc alloy steel serves a broad product spectrum—from roofing panels and sandwich wall systems to appliance casing, furniture, bus body parts, and signage.

Their combination of colour customisation, corrosion resistance 3x, lightweight strength, and versatility has made

them foundational for modern industrial and architectural applications the world over.

This is resulting in customers willing to pay a premium for this product, strengthening margins and market attractiveness for manufacturers.

Advanced features

Corrosion resistance

The alloy coating provides barrier and protection, significantly enhancing the lifespan even plain zinc or steel.

Aesthetic versatility

Offered in a broad palette – gloss, textured, metallic, embossing – and retains colour and finish for decades.

Lightweight and strong

Lower coating weight by 40%; ideal for modular and prefabricated applications, enabling easy handling and installation.

Thermal and energy performance

Reflective coatings help reduce heat gain in roofing – lowering building cooling costs.

Formability

Sheets can be cut, bent, punched, or rolled with minimal risk of cracking paint—enhancing design flexibility.

OUTLOOK

IN INDIA, PRE-PAINTED ALU-ZINC STEEL IS BEING USED ACROSS A RANGE OF INDUSTRIES

Overview

Pre-painted Alu-Zinc steel is used in a wide array of end-use products across the construction, industrial, and consumer appliance sectors. These coated sheets are prized for their corrosion resistance, aesthetic versatility, lightweight strength, and fabrication ease.

Roofing and cladding: Pre-painted steel is extensively used for corrugated roofing, single-skin cladding panels, and architectural façades in residential, industrial, and commercial buildings. Their durability, colour retention, and thermal reflectivity make them a preferred choice for modern construction.

Sandwich and insulated panels: This flat steel serves as the exterior layer for PU sandwich panels, widely used in cold storage, warehousing, prefab structures, and cleanroom enclosures.

Rolling shutters and industrial profiles: Lightweight and anti-corrosive, this steel is perfect for rolling shutter doors, garage doors, partitions, and modular wall systems.

Agricultural structures: Used in greenhouses, silos, barns, and feeder systems, this steel supports rural infrastructure with weather-resistant agricultural buildings and equipment.

Building accessories: From ceiling panels and metal ceilings to internal partition boards and ventilation ductwork, this flat steel adds aesthetic and functional value in interiors.

Home appliances and electronics: It serves as the outer casing for refrigerators, washing machines, ovens, air-conditioners, microwaves, and electrical panels, combining aesthetics and corrosion resistance.

Steel furniture: In wardrobes, lockers, shelving, tables, and chairs, pre-painted sheets offer a durable, colourful, and modern alternative to traditional wood or metal furniture.

Cold storage and HVAC equipment: This flat steel is used in the manufacture of cold rooms, refrigeration chambers, HVAC ducts, chillers, and water heaters, where thermal insulation and hygiene are critical.

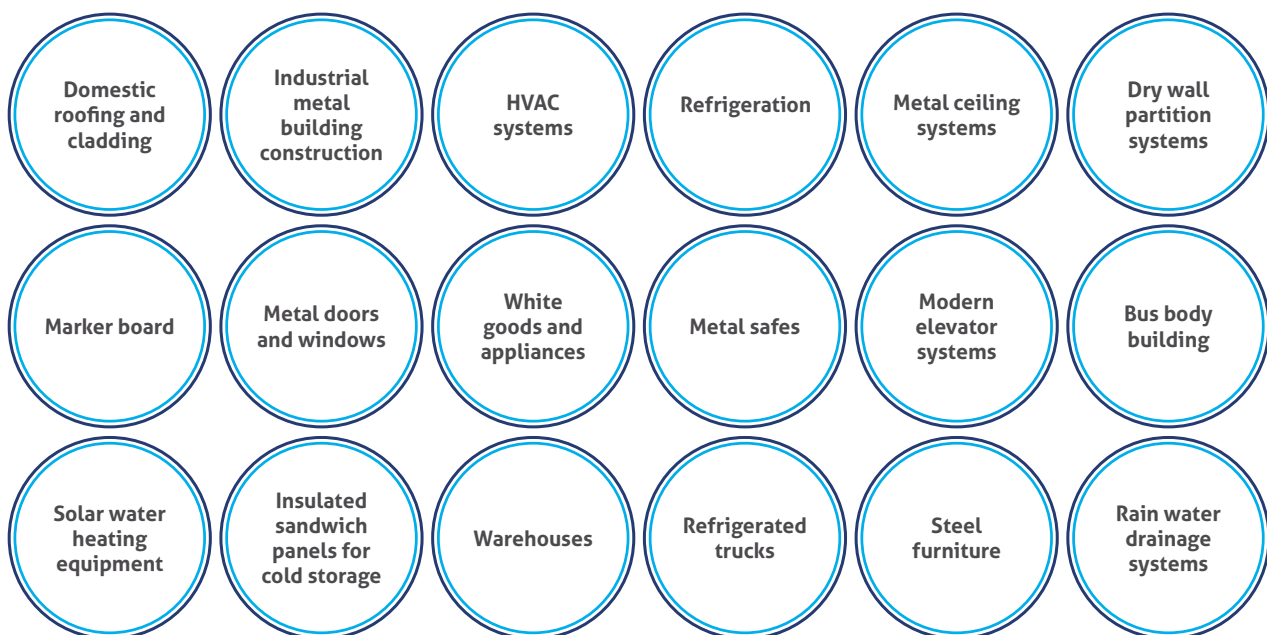

Commercial signage and specialty applications: Pre-painted Alu-Zinc steel features in sign boards,

guardrails, solar racks, acoustic walls, and architectural facades—where durability and customised finish matter.

Conclusion

The Company is increasing investments in this product line, position itself among select and large manufacturers of this future-facing product in India.

VALUE CREATION AT OUR COMPANY

INTEGRATED VALUE CREATION

HOW WE ENHANCE INTEGRATED VALUE FOR STAKEHOLDERS AT OUR COMPANY

Overview

There is a growing trend towards integrated appraisals of companies, which consider a broad range of factors beyond just financial performance. This comprehensive approach encompasses aspects such as management commentary, governance, remuneration, and sustainability.

This holistic methodology provides a deeper understanding of how our Company serves the diverse needs of all stakeholders, including employees, customers, suppliers, business partners, local communities, shareholders, lenders, legislators, regulators, and policymakers. We have evolved towards a more modern understanding of value creation where we prioritise the well-being of our entire stakeholder ecosystem.

Our commitment to transparency and accountability is reflected in our Integrated Report, which captures the breadth of our stakeholder engagement and performance. This comprehensive report provides a nuanced understanding of our Company's impact and value creation across multiple dimensions.

THE BLUEPRINT OF HOW MCMIL IS COMMITTED TO ENHANCE VALUE

Strategy

- Positioning the Company as a value-added flat steel producer
- Extend beyond commodity to customised products
- Manufacture products that service under-addressed or sustainably growing needs.
- Enhance environmental responsibility through sustainable practices.

Procurement economies

- Fostering lasting relationships with key suppliers; reliable resource procurement.
- Optimising costs through localised and proximate procurement.
- Achieving a competitive edge due to excellent market reputation and credibility.
- Sourcing a larger resource share from MSME vendors, strengthening the MSME economy.

Purpose of existence

- Crafting superior products that exceed customer expectations
- Introducing innovative, differentiated products that set us apart
- Contributing to a safer, cleaner world through sustainable practices and responsible innovation.

Products basket

- Manufacture three prominent products (premium pre-painted steel, hot-dip galvanised steel and high-strength Galvanised Corrugated steel).
- Market under the ColourStrong, Zingalvo and Singham brands.
- Successfully grow the international and domestic presence for these products
- Offer products that can be customised to specific customer needs.

Broad-based strategy

- Produce synergistic flat steel products that optimise resource utilisation
- Align with national priorities by leveraging bio-resources and promoting sustainable development
- Derive all our revenues from environmentally friendly raw materials, reinforcing our commitment to eco-friendly practices.
- Increase Indian steel industry's global footprint.

Brand and customer capital

- Establish 'MCMIL' as a trusted and reputable corporate brand, synonymous with excellence
- Ensure a consistent delivery of high-quality products, on-time and in-full, exceeding customer expectations
- Drive business growth while prioritising Environmental, Social, and Governance (ESG) responsibilities, embedding sustainability into our operations.

Footprint

- Optimise and expand production capacity at our existing factory, driving efficiency and increased output
- Foster long-term, mutually beneficial relationships with stakeholders, creating a stable and predictable revenue stream
- Nurture strong partnerships with trade partners and direct clients, delivering value and building loyalty through exceptional service and support.

Environment integrity

- Minimise resource consumption per unit of production, promoting the efficient use of materials and reducing waste
- Optimise water withdrawal and energy usage, adopting responsible and environmentally friendly practices
- Ensure a compliance with prevailing standards and regulations, benchmarking our performance against industry best practices and continuously improving our sustainability metrics.

Community support

- Embody responsible citizenship through meaningful community engagement and social investments
- Focus on integrated development
- Engage in a sustainable way for extended impact

DRIVERS OF OUR VALUE FOR STAKEHOLDERS

Shareholders

- Secure financial resources from a diverse range of investors, promoters, banks, and financial institutions through debt, net worth, and accruals.
- Grow the business through shareholder funds.
- Maintain superior liquidity to ensure financial flexibility and stability.
- Continuously improve all profitability ratios to maximise returns on investment and drive business growth.

Customers

- Strengthen our presence as a reliable and dependable long-term partner, fostering trust and loyalty with our customers and stakeholders.
- Deliver quality products that address the evolving needs and expectations of our customers, ensuring consistency and reliability.
- Enhance value for our customers through improved accessibility, availability, and affordability, making our products and services more inclusive and customer-centric.

Employees

- Provide career-enhancing employment opportunities that offer stability, growth, and development prospects for our employees.
- Deepen subject matter expertise and experience across the organisation, encouraging continuous learning, innovation, and professional development.
- Invest in creating a workplace culture marked by meritocracy, delegation, and empowerment, where employees are motivated, engaged, and equipped to excel in their roles.

Communities

- Actively engage in community welfare programs and activities that promote social well-being and development.
- Widen the circle of prosperity by creating opportunities for economic growth and social mobility, benefiting a broader spectrum of the community.
- Identify and address unmet community needs, providing support and resources to vulnerable populations and promoting a more equitable society.

Government

- Fulfill our tax obligations and make timely contributions to the exchequer, demonstrating our commitment to transparency and accountability.
- Drive rural employment opportunities, empowering local communities and contributing to inclusive economic growth.
- Invest in safe and sustainable operations, prioritising environmental stewardship, social responsibility, and the well-being of our employees and communities.

THE KEY ELEMENTS THAT CONTRIBUTE TO VALUE CREATION AT OUR COMPANY

Financial capital

We drive our business growth through strategic funding from a diverse range of sources, including investors, promoters, banks, government agencies, and financial institutions.

We aim to optimise capital allocation and maintain a strong Balance Sheet while generating strong free cash flows.

Our financial performance includes an operating profit of Rs. 65 Cr, net worth of Rs.226.70 Cr, EBITDA margin of 7.98%, PAT margin of 2% and a debt-to-equity ratio of 1.79. Our credit rating includes ACUITE A- for long-term bank facilities and ACUITE A2+ for short-term bank facilities

Manufactured capital

We allocate our capital to manufacturing infrastructure, cutting-edge technologies, specialised equipment, and efficient logistics, ultimately driving production excellence. Our focus is on continuously optimising capital effectiveness through ongoing improvements and innovation.

We invest in cutting-edge equipment and machinery to ensure efficient and safe operations, supporting our sustainable cash flow generation. Our inputs include a Gross Block of Rs. 185.60 Cr and state-of-the-heart manufacturing facilities at Kutch and Bhopal, with a combined manufacturing capacity of 1,32,000 MTPA. We achieved significant value creation, with a 5.99% increase in revenue from operations and a 36.97% increase in net profit.

Human capital

We prioritise investments in our people, including in-house talent and contracted experts, to foster their growth, expertise, and experience. Our focus is on continuously developing our human capital, amplifying their passion, productivity, and performance.

Manaksia Coated comprises 400+ employees and conducts in-house training and motivational programs. We are a certified Great Workplace and have received awards for promoting employee well-being and excellence in HR development practices and CSR. We maintain a compliance with the needs of government agencies and have a lean Board with 4 Independent Directors. Our policies and programs prioritise the overall development of our teams.

Our manufacturing units are certified with ISO 9001:2015, ISO 14001:2015 and ISO 45001:2018 and awarded a 3-star Export House status.

Natural capital

We responsibly source natural resources, striving to minimise our environmental footprint. Our approach is guided by a commitment to sustainability, aiming to maximise value while reducing our ecological impact.

The Company is engaged in waste recycling and water conservation; it manufactures pre-painted and galvanised roofing sheets through industrial waste.

The solar plant that MCMIL is working to set up will generate 7MW of renewable energy.

Intellectual capital

We harness the power of proprietary knowledge to drive cost efficiencies, operational excellence, and innovation. Our focus is on amplifying the value of our intangible assets, including our brand and goodwill, to achieve market differentiation and superior business outcomes.

Our Company prioritises high-value activities, ensuring consistent presentation and real-time data logging. We benchmark and micro-monitor our performance, striving to maintain data integrity and improve data reporting. Through continuous investment, gate and weighbridge automation and user enablement, we reduce vehicle turnaround times while upholding data and security standards. We remain committed to consistent monitoring and decision-making support through our decision-making dashboards.

Social and Relationship capital

We strengthen our connections with local communities, partners, vendors, suppliers, and customers through strategic investments. This commitment to shared growth and prosperity reinforces our corporate citizenship, stability, and long-term sustainability.

Our Company will focus on developing urban and rural areas within the states where it operates. To sustain and enhance the quality of life of the communities it serves, the Company plans to allocate at least 2% of its average net profit from the preceding three years towards CSR activities. Our Company's finished products are stocked and sold by dealers and distributors across 44 countries, 20+ Indian States and 2+ Indian Union Territories.

Business-strengthening initiatives

- The Company prioritised operational efficiency and near-full capacity utilisation to reduce costs.
- Exports shifted from the spot business to a relationship-based approach.
- It plans to upgrade its galvanising line to Alu-Zinc technology to enhance margins
- It will commission a 7 MW captive solar power plant to moderate costs
- It invested to increase its pre-painted steel capacity to 235,000 MT by Q4 FY 2026.
- It will initiate a backward integration into cold rolled steel, expected to enhance margins

Strengths

- Consistently improving financial performance, marked by high operational efficiency and capacity utilisation.
- Robust export presence, with key markets in Europe and Latin America.
- Advanced technology adoption (Alu-Zinc line) and infrastructure investments (solar power).
- Diversified portfolio and a strong export order book
- Enhanced financial flexibility through equity infusion and debt reduction.

Our value proposition

At MCMIL, our focus on continuous improvement empowers customers to deliver a competitive advantage to customers through the following advantages:

Management: The management is committed to enhance value for customers through superior products and service.

In-depth industry experience: Decades of expertise in the coated metals sector empower us to understand market needs and deliver reliable, high-performance solutions.

Complete quality assurance: Our rigorous quality control systems ensure consistent product performance, delivering the best return on investment for our customers.

Modern production infrastructure: Equipped with state-of-the-art machinery and automation, our facilities enable quick turnaround times and assured product availability.

Extensive product range: From galvanised to pre-painted steel, our diverse portfolio is manufactured and managed entirely in-house, offering convenience and consistency.

Ongoing R&D and innovation: Continuous research and development drive improvements in product quality and support the creation of value-added, in-house brands.

Customer-first philosophy: We prioritise long-term relationships by offering customised solutions, responsive service, and an unwavering commitment to customer satisfaction.

PRODUCT #1

GALVANISED STEEL

At Manaksia Coated, manufacture galvanised steel sheets and coils of the finest quality, with our advanced continuous galvanising line with non-ox furnace. The surface finish, powerful zinc adhesion, and other product parameters conform with international quality standards, delivering strength, durability and excellence.

With a combination of a state-of-the-art galvanising line, other production infrastructure, and agile manufacturing standards, MCMIL is a globally recognised manufacturer of galvanised steel.

Our process

By adhering to a streamlined, advanced, and automated manufacturing process, we ensure optimal quality of our entire product range. Our state-of-the-art continuous

galvanising line enables excellent surface cleaning, annealing, and preparation of the steel strip before it enters the hot dip galvanising zinc bath via a non-ox furnace. The zinc bath composition is controlled to achieve ideal coating properties and enhanced zinc adhesion in order to create a pacification coat around the steel, keeping moisture out and preventing corrosion.

The zinc coating thickness is controlled to the highest grades of precision through an automated air-knife system. A perfect finish and flatness to the surface is achieved through a skin-pass mill and a tension leveler. Post-surface treatment in the form of chromating or application of AFP and organic coatings enhance corrosion resistance and provide surface sheen. The process is computer aided to help achieve higher uniformity and perfection.

PRODUCT #2

PRE-PAINTED STEEL

At Manaksia Coated, we specialise in manufacturing pre-painted steel sheets and coils that combine metallic strength, paint aesthetics, corrosion resistance and quality.

Mark of excellence

Our advanced processing and coating techniques ensure superior adhesion of pre-painted steel to the base metal, delivering high performance even during roll forming, bending and other fabrication stages. Our innovative 'two coat-two bake' process involves two cycles of coating and baking following a thorough pre-treatment, resulting in a durable and uniform finish.

Our process

We focus on maintaining world-class product quality standards, by following an agile, systematic, state-of-the-art manufacturing process. Advanced processing and coating techniques are implemented to ensure that the coating adheres firmly to the base metal and does not peel during roll forming, bending or any other process.

A 'two coat-two bake' process, that involves two steps of coating and baking after the sheet has undergone pre-treatment, helps us optimise product quality. The substrate metal is first coated with a primer to allow better adhesion with the second coating of paint, which gives the product a vibrant look and provides additional protection against extreme weather conditions, improving its longevity.

OUR TALENT MANAGEMENT REVIEW

Overview

In FY 2024–25, the human resources function at MCMIL focused on transforming itself into an enabler of organisational goals. Faced with challenges related to talent retention, skill gaps (due to digital

shifts), recruitment competition, and hybrid work adaptation, the HR division responded with a proactive, data-driven approach. The function embraced automation, digital learning, and employee-centric policies to strengthen engagement

and performance. By aligning its strategies with the broader business objectives, HR delivered tangible improvements in attrition rates, hiring timelines, employee satisfaction, and compliance.

Highlights, FY 2024-25

- The Company reduced voluntary attrition by 18% through personalised engagement and development plans.
- The Company decreased average time-to-hire by 25% to enhance recruitment quality and speed.
- The Company trained over 70% of employees in future-relevant skills (digital tools, leadership, cross-functional collaboration).
- The Company improved employee satisfaction scores by 15% via the biannual Pulse Surveys.
- The Company achieved a 100% compliance in internal audits after comprehensive HR policy updates.

Initiatives, FY 2024 -25

- The Company launched a comprehensive digital HR transformation, streamlining systems for efficiency and transparency.
- The Company introduced a future-skills development program to build digital capabilities across teams.
- The Company created a leadership pipeline through high-potential programs and mentoring initiatives.
- The Company enhanced mental wellness and flexible work programs to boost retention and engagement.
- The Company embedded a data culture within the HR team to manage talent risks and business needs.

Strengths

- Strategic alignment with goals and performance metrics.
- Agile digital-ready operations, improving process speed and responsiveness.
- Robust learning and development infrastructure, supporting upskilling.
- Employee-centric approach focusing on well-being, diversity, and career growth.
- Reliable compliance and risk management ensuring ethical and legal integrity.

Outlook

The talent management team is set to play a growing role in driving transformation. The function will continue investing in AI-driven analytics for smarter talent decisions and workforce planning. There will be an emphasis on enhancing the employee experience, advancing digital capabilities, and developing leadership at all levels. With its strong foundation in technology, people-centricity, and agility, the HR division is positioned to support the Company's evolving needs and act as a collaborative innovation partner.

HOW WE ARE DEEPENING BUSINESS SUSTAINABILITY

Sustainability

As a responsible corporate organisation, we are committed to the cause of holistic growth. Through conscious and responsible actions and initiatives, we look to build a culture of goodness, forging a bond between our people, partners, stakeholders and the ecosystem. With a shared sense of purpose, we are on a mission to shape a brighter future for all.

Coating for the greater good

We undertook a series of sustainable practices and green initiatives to build a stronger, better future for the planet. These included:

OUR COMMUNITY ENGAGEMENT

Overview

At Manaksia Coated, our Corporate Social Responsibility (CSR) initiatives balance economic, social, and environmental objectives. We prioritise stakeholder expectations and shareholder value while encouraging employee volunteerism, enabling them to give back to local communities. Our CSR projects are selected through a participatory process, involving community consultations and aligning with Schedule VII of the Companies Act, 2013. We execute these projects

directly or through affiliated Trusts and Societies, ensuring a compliance with relevant Acts and Rules.

At MCMIL, we prioritise societal, ecological, and environmental well-being as fundamental aspects of our operations. We believe that corporate social responsibility is essential for fostering sustainable business practices and promoting inclusivity.

Our CSR initiatives focus on critical areas such as education, healthcare, environmental conservation, and community development, reflecting

our commitment to making a positive impact in the communities we serve.

Our vision is to change lives through collective development and environmental sustainability. In line with this, our mission is to pursue initiatives that enhance societal welfare while ensuring a long-term perspective on environmental sustainability.

By integrating these values into our corporate ethos, we strive to create a better future for all stakeholders.

MANAGEMENT DISCUSSION AND ANALYSIS

Global economic review

Overview

Global economic growth declined marginally from 3.3% in 2023 to an estimated 3.2% in 2024. This was marked by a slowdown in global manufacturing, particularly in Europe and parts of Asia coupled with supply chain disruption and weak consumer sentiment. In contrast, the services sector performed more creditably.

The growth in advanced economies remained steady at 1.7% from 2023 to 2024 as the emerging cum developing economies witnessed a growth decline at 4.2% in 2024 (4.4% in 2023).

On the positive side, global inflation was expected to decline from 6.1% in 2023 to 4.5% in 2024 (projected at 3.5% and 3.2% in 2025 and 2026, respectively). This decline was attributed to the declining impact of erstwhile economic shocks, and labour supply improvements. The monetary

policies announced by governments the world over helped keep inflation in check as well.

The end of the calendar year was marked by the return of Donald Trump as the new US President. The new US government threatened to impose tariffs on countries exporting to the US unless those countries lowered tariffs for the US to export to their countries. This enhanced global trade and markets uncertainty and emerged as the largest singular uncertainty in 2025.

World output	3.2	3.3
Advanced economies	1.7	1.7
Emerging and developing economies	4.2	4.4

Performance of the major economies, 2024

United States: Reported GDP growth of 2.8% in 2024 compared to 2.9% in 2023.

China: GDP growth was 5.0% in 2024 compared to 5.2% in 2023.

United Kingdom: GDP growth was 0.8% in 2024 compared to 0.4% in 2023.

Japan: GDP growth was 0.1% in 2024 compared with 1.9% in 2023.

Germany: GDP contracted by 0.2% in 2024 compared to a 0.3% decline in 2023.

(Source: CNBC, China Briefing, ons.gov.uk, Trading Economics, Reuters)

Outlook: The global economy has entered a period of uncertainty following the imposition of tariffs of products imported into the USA and some countries announcing reciprocal

tariffs on US exports to their countries. This is likely to stagger global economic growth, the full outcome of which cannot be currently estimated. This risk is supplemented by risks related to conflicts, geopolitical tensions, trade restrictions and climate risks. In view of this, World Bank projected global economic growth at 2.7% for 2025 and 2026, factoring the various economic uncertainties. (Source: IMF, United Nations)

Indian economic review

Overview

The Indian economy grew at 6.5% in FY 2024-25, compared to a revised 9.2% in FY 2023-24. This represented a four-year low due to a moderate slowdown within the Indian economy (marked by slower manufacturing growth and a decline in net investments). Despite the slowdown, India retained its position as the world's fifth-largest economy.

India's nominal GDP (at current prices) was Rs.330.68 trillion in FY 2024-25 (Rs.301.23 trillion in FY 2023-24). The nominal GDP per capita increased from Rs.2,15,936 in FY 2023-24 to Rs.2,35,108 in FY 2024-25, reflecting the impact of an economic expansion.

The Indian rupee weakened 2.12% against the US dollar in FY 2024-25, closing at Rs.85.47 on the last trading day of FY25. In March 2025, the rupee recorded the highest monthly appreciation since November 2018, rising 2.39% (arising out a weakening US dollar).

Inflationary pressures eased, with CPI inflation averaging 4.63% in FY 2024-25, driven by moderating food inflation and stable global commodity prices. Retail inflation at 4.6% in FY 2024-25, was the lowest since the pandemic, catalysing savings creation.

India's foreign exchange reserves stood at a high of \$676 billion as of 4th April 2025. This was the fourth consecutive year when rating upgrades outpaced downgrades

on account of strong domestic growth, rural consumption, increased infrastructure investments and low corporate leverage (annualised rating upgrade rate 14.5% exceeded the decade-long average of 11%; downgrade rate was 5.3%, lower than the 10-year average of 6.5%).

Gross foreign direct investment (FDI) into India rose 13.6% to \$81 billion during the last financial year, the fastest pace of expansion since 2019-20. The increase in the year was despite a contraction during the fourth quarter of FY 2024-25 when inflows on a gross basis declined 6% to \$17.9 billion due to the uncertainty caused by Donald Trump's election and his assertions around getting investments back into the US.

The banking sector continued its improvement, with gross non-performing assets (NPA) for scheduled commercial banks (SCBs) declining to 2.6% as of September 2024, down

from 2.7% in March 2024. The capital-to-risk-weighted assets ratio for SCBs stood at 16.7% as of September 2024, reflecting a strong capital position.

India's exports of goods and services reached \$824.9 billion in FY 2024-25, up from \$778 billion in the previous fiscal year. The Red Sea crisis impacted shipping costs, affecting

price-sensitive exports. Merchandise exports grew 6% YoY, reaching \$374.1 billion.

India's net GST collections increased 8.6%, totalling Rs.19.56 lakh crore in FY 2024-25. Gross GST collections in FY 2024-25 stood at Rs.22.08 lakh crore, a 9.4% increase YoY.

On the supply side, real gross value added (GVA) was estimated to expand 6.4% in FY 2024-25. The industrial sector grew by 6.5%, supported by growth in construction activities, electricity, gas, water supply and other utility services.

India's services sector grew at 8.9% in FY25 (9.0% in FY24), driven by public administration, defence and other services (expanded at 8.8% as in the previous year). In the infrastructure and utilities sector, electricity, gas, water supply and other utility services grew a projected 6.0% in FY25, compared to 8.6% in FY24. Meanwhile, the construction sector expanded at 9.4% in FY25, slowing from 10.4% in the previous year.

Manufacturing activity was subdued in FY25, with growth at 4.5%, which was lower than 12.3% in FY24. Moreover, due to lower public spending in the early part of the year, government final consumption expenditure (GFCE) is anticipated to have slowed to 3.8% in FY25, compared to 8.1% in FY24.

The agriculture sector grew at 4.6% in FY 2024-25 (1.4% in FY 2023-24). Trade, hotel, transport, communication and services related to broadcasting segment were estimated to grow at 6.4% in 2024- 25 (6.3% in FY 2023-24).

From a demand perspective, the private final consumption expenditure (PFCE) exhibited robust growth, achieving 7.2% in FY 2024-25, surpassing the previous financial year's rate of 5.6%.

The Nifty 50 and SENSEX recorded their weakest annual performances in FY 25 in two years, rising 5.3% and 7.5% during the year under review respectively. Gold rose 37.7% to a peak of \$3,070 per ounce, the highest

increase since FY 2007-08, indicating global uncertainties.

Total assets managed by the mutual fund (MF) industry jumped 23% or Rs.12.3 lakh crore in fiscal 2025 to settle at Rs.65.7 lakh crore. At close of FY25, the total number of folios had jumped to nearly 23.5 crore, an all-time peak. During last fiscal, average monthly systematic investment plan (SIP) contribution jumped 45% to Rs.24,113 crore.

Foreign portfolio investments (FPIs) in India experienced high volatility throughout 2024, with total inflows into capital markets reaching approximately \$20 billion by year-end. However, there was significant selling pressure in the last quarter, influenced by new tariffs announced by the new US government on most countries (including India).

Outlook

India is expected to remain the fastest-growing major economy. Initial Reserve Bank of India estimates have forecast India's GDP growth downwards from 6.7% to 6.5% based on risks arising from US tariff levies on India and other countries. The following are some key growth catalysts for India in FY26.

Union Budget FY 2024-25: The Union Budget 2025-26 laid a strong foundation for India's economic trajectory, emphasising agriculture, MSMEs, investment, and exports as the four primary growth engines. With a fiscal deficit target of 4.4% of GDP, the government reinforced fiscal prudence while allocating Rs.11.21 lakh crore for capital expenditure (3.1% of GDP) to drive infrastructure development. The February 2025 Budget marked a shift in approach, with the government proposing substantial personal tax cuts. Effective 1st April 2025, individuals earning up to Rs.12 lakh annually will be fully exempt from income tax. Economists estimate that the resulting Rs.1 lakh crore in tax savings could boost consumption by Rs.3-3.5 lakh crore, potentially increasing the nominal private final consumption Expenditure

(PFCE) by 1.5-2% of its current Rs.200 lakh crore.

Free trade agreement: In a post-Balance Sheet development, India and the United Kingdom announced a free trade agreement to boost strategic and economic ties. This could lead to a significant increase in the export competitiveness of Indian shipments in the UK across the textiles, toys, leather, marine products, footwear, and gems & jewellery sectors. About 99% of Indian exports to UK will enjoy zero-duty access tariff cuts; India will cut tariffs on 90% of tariff lines and 85% could become fully duty-free within 10 years.

Pay Commission impact: The 8th Pay Commission's awards could lead to a significant salary revision for nearly ten million central government employees. Historically, Pay Commissions have granted substantial pay hikes along with generous arrears. For instance, the 7th Pay Commission more than tripled its monthly salaries, raising the range from Rs.7,000 to Rs.90,000 to Rs.18,000 to Rs.12.5 lakh, triggering a widespread ripple effect.

Monsoons: The India Meteorological Department predicted an 'above normal' monsoon in 2025. This augurs well for the country's farm sector and a moderated food inflation outlook.

Easing inflation: India's consumer price index-based retail inflation in March 2025 eased to 3.34%, the lowest since August 2019, raising hopes of further repo rate cuts by the Reserve Bank of India.

Deeper rate cuts: In its February 2025 meeting, the Monetary Policy Committee (MPC) reduced policy rates by 25 basis points, reducing it to 6% in its first meeting of FY 2025-26. Besides, India's CPI inflation is forecasted at 4% for the fiscal year 2025-26.

Lifting credit restrictions: In November 2023, the RBI increased risk weights on bank loans to retail borrowers and NBFCs, significantly tightening credit availability. This led to a sharp slowdown in retail credit

growth from 20-30% to 9-13% between September 2023 and 2024. However, under its new leadership, the RBI has prioritised restoring credit flow. Recent policy shifts have

removed restrictions on consumer credit, postponed higher liquidity requirements for banks, and are expected to rejuvenate retail lending.

Indian steel industry overview

The Indian flat steel industry forms a crucial component of the country's steel sector, supporting a wide range of industries including construction, automotive, white goods, and infrastructure. Flat steel products such as hot rolled coils (HRC), cold rolled coils (CRC), galvanised steel, and pre-painted galvanised steel (PPGI) are essential materials used across core sectors. In FY24, India's finished steel consumption rose to 138.5 million tonnes (MT) reflecting a robust 15.6% year-on-year growth. It was backed by strong government push through schemes like the National Infrastructure Pipeline, Gati Shakti, and PLI for Specialty Steel, aimed at promoting domestic production and value addition.

India also strengthened its position as the second-largest producer of crude steel, with production reaching 143.6 MT in FY24, up from 125.3 MT in FY23. The country's installed steel-making capacity stood at 154 MT as of March

2023, with plans to expand to nearly 300 MT by 2030 under the National Steel Policy 2017. Leading producers such as JSW Steel, Tata Steel, and SAIL continue to invest in downstream flat steel capabilities and product differentiation. Despite a high domestic output, India turned into a net importer of finished steel in FY24, with imports rising 38% YoY to 8.3 MT, driven by low-priced global supplies and strong local demand. At the same time, exports rose by 11.5% to 7.5 MT, showing resilience in overseas markets.

The construction and infrastructure sector remains the dominant consumer, accounting for nearly 60% of total flat steel consumption, followed by the automotive and white goods sectors, which together contribute around 20–25%. Urbanisation, housing growth, and transport corridor development have kept demand elevated. Flat steel prices also remained firm, with hot rolled coils averaging Rs.49,200–51,200 per tonne and CRC at Rs.58,000–62,000 per

tonne in late FY24. The flat steel segment is expected to grow at 8–9% annually, supported by higher per capita steel consumption (currently below the global average of ~240 Kg), rising industrial output, and an increasing share of value-added coated steel products.

However, the sector faces challenges such as raw material price volatility, import dependency for coking coal, and logistics and infrastructure bottlenecks, particularly in the eastern and central belts. Import competition from countries like China, Korea, and Vietnam also adds pricing pressure on domestic players. To counter this, the government is considering safeguards like anti-dumping duties and incentivising green steel and recycling initiatives. With continued policy support, technology upgrades, and focus on product innovation, the Indian flat steel industry is well-positioned for sustained long-term growth.

Galvanised steel products review

Galvanised steel is a product that is an outcome of molten zinc coating on flat carbon steel, to enhance its resistance to corrosion. This protective zinc layer shields the underlying steel from moisture, humidity, and other environmental factors that typically lead to rusting. A key feature of the galvanisation process is the formation of a layer between the zinc coating and the steel substrate, which ensures extended durability and protection. The growing demand for galvanised steel is largely driven

by its corrosion resistance and long-lasting performance, making it a preferred material across construction, automotive, and industrial applications. Reflecting this rising demand, the global galvanised steel market was valued at US\$ 102.1 billion in 2024 and is projected to reach US\$ 172.1 billion by 2034, growing at a compound annual growth rate (CAGR) of 5.9% over the forecast period.

The Indian galvanised steel market generated a revenue of US\$ 22,715.7 million in 2024 and is projected to reach US\$ 34,408.7 million by 2030, growing at a CAGR of 7.4% between

2025 and 2030. Among various end-use segments, building and construction emerged as the largest contributor to market revenue in 2024, driven by robust infrastructure development. The appliances segment is expected to witness the fastest growth during the forecast period, making it the most lucrative segment going forward. In terms of global contribution, India accounted for 9.4% of the global galvanised steel market revenue in 2024, underlining its growing importance in the international steel landscape.

Pre-painted galvanised steel coil review

Pre-painted galvanised steel coil (PPGI) is a type of steel coil that has been coated with a layer of zinc (galvanised) and then painted with a protective and decorative layer. This multi-step process enhances the steel's corrosion resistance, durability, and aesthetic appearance, making it suitable for a wide range of industrial and consumer applications.

The PPGI market was valued at US\$ 16.5 billion in 2024 and is projected to grow to US\$ 25.2 billion by 2033, registering a CAGR of 5.5% from 2026 to 2033. Between 2024 and 2031, the market is expected to grow at an even higher CAGR of 6.3%, fuelled

by accelerating industrialisation and infrastructure development, particularly in the Asia-Pacific region. PPGI refers to galvanised steel coils that are coated with a layer of paint over the zinc layer, offering enhanced corrosion resistance and visual appeal. Colour Coating Is Done on substrate metals like Galvanised Steel, Alu-Zinc Coated Steel, and Aluminum. The production process involves a specialised coil coating method in which steel undergoes thorough cleaning, primer coating, and then the application of a uniform paint layer. This not only improves the material's surface finish but also ensures long-term durability in challenging environmental conditions.

The global PPGI market is being shaped by strong contributions from

emerging economies, where rapid urbanisation and government-led infrastructure initiatives are boosting consumption. China remains a dominant force, accounting for nearly 50% of the world's steel production as of 2023, thereby playing a critical role in influencing global supply and pricing trends. There is a growing shift towards environmentally responsible materials—PPGI being both recyclable and energy-efficient, aligns well with this trend. With increasing demand across multiple end-use sectors and ongoing advancements in coil coating technology, the pre-painted galvanised steel market is poised for consistent growth and wider adoption in the years ahead.

Growth drivers

Rising global steel production:

According to the US Geological Survey, global steel production reached approximately 1.9 billion metric tons in 2022, supporting the rising demand for coated steel.

Infrastructure growth in emerging economies:

Countries like India and China are experiencing robust demand growth due to urbanisation and infrastructure investments.

Demand for lightweight, durable materials:

Construction and automotive sectors are increasingly opting for PPGL over traditional materials like aluminum and wood.

Environmental preferences:

PPGI is recyclable, energy-efficient, and long-lasting, aligning well with sustainability trends.

Government initiatives driving steel growth

Infrastructure growth: With Rs.11.11 lakh crore allocated in Union Budget FY26, infrastructure development under schemes like PM Gati Shakti, Bharatmala, and Smart Cities is accelerating the demand for Alu-Zinc and colour coated steel. These materials are preferred in pre-engineered buildings (PEBs) and rural housing (e.g., PMAY) for their durability, ease of use, and aesthetics.

PLI for coated steel (Phases 1 & 1.1):

The Rs.6,322 crore PLI scheme for specialty steel supports coated steel production, including Galvalume and colour coated variants. The recently relaxed Phase 1.1 encourages broader industry participation, fostering capacity expansion and value-added steel output.

Solar and renewable energy demand:

Alu-Zinc steel is gaining traction in solar infrastructure for mounting structures and frames due to its corrosion resistance. The Rs.75,000 crore PM Surya Ghar Yojana and MNRE mandates are driving strong demand in this sector.

Affordable housing and rural infra:

Government initiatives like PMAY-Gramin, Jal Jeevan Mission, and Swachh Bharat are promoting the use of colour coated steel for roofing, tanks, and sanitation units. Its lightweight, long-lasting nature makes it ideal for cost-effective, fast-paced construction.

Manufacturing growth: PLI schemes in white goods and FMCG sectors are boosting the demand for pre-painted and Alu-Zinc steel in appliances, ducting, and EV components. These materials offer superior surface finish and corrosion resistance.

Cold chain and agri infrastructure:

The Agriculture Infrastructure Fund and PM Kisan Sampada Yojana are increasing the need for steel-based cold storages and warehouses. Alu-Zinc and coated steel meet hygiene, insulation, and durability requirements in food and pharma logistics.

SWOT analysis for MCMIL

- Skilled and cost-effective manpower supports efficient manufacturing.
- Technologically advanced plant and machinery at the Kutch, Gujarat facility.
- Diverse product applications across construction, automotive, appliances, and general engineering sectors.
- Strong domestic and international market presence, including Europe, Africa, and the Middle East.
- Proximity to port gives us a competitive edge to import low cost raw material and export finished products with higher cost efficiency.
- Nimble and agile setup which adapts to changes in the market and customer needs.

- Higher logistics cost affecting our competitiveness in the remote and distant parts of the country since our manufacturing facility is located in the Western part of India .
- The scale of business operations is smaller when compared with larger integrated steel companies.
- Lack of complete backward integration and dependence on integrated steel plants for raw materials.

- Untapped potential in international markets with low export penetration.
- Low per capita steel consumption in India indicates room for growth.
- Expanding Indian economy and government focus on infrastructure development.
- Emerging demand from rural markets and growing construction activities under public infrastructure schemes.
- Demand being driven by multiple sectors such as construction, home appliances, auto motive, and general engineering.

- Risk of material dumping by foreign players during global economic slowdowns.
- Slow industry growth in certain segments could affect volume and pricing.
- Uncertain geo-political environment leading to unforeseen challenges.

Company review

Manaksia Coated Metals & Industries Limited (MCMIL) is a leading manufacturer and exporter of coated steel products, specialising in Pre-painted Galvanised Steel and Plain Galvanised Steel in both coil and sheet forms. Operating from a state-of-the-art facility in Kutch, Gujarat, the Company serves a broad spectrum of industries including construction, automotive, appliances, and general engineering. MCMIL is committed to delivering superior quality, value-added steel products by leveraging technologically advanced plant and machinery. Its diverse customer base spans across FMCG, home appliances, general engineering, and construction sectors. With a strong presence in both domestic (India) and international markets including Europe, Africa, and the Middle East, MCMIL continues to drive product innovation, performance

enhancement, and capacity expansion. Backed by established brands with consistent market demand, the Company is well-positioned for sustained growth and further market expansion.

Our products range

Galvanised steel sheets and coils:

Galvanised steel is known for its exceptional quality, achieved through precise zinc coating control and advanced surface treatment processes that significantly enhance corrosion resistance. Manufactured using state-of-the-art technology, it ensures uniform coating thickness and consistent quality in line with international standards. This results in superior protection against moisture, humidity, and environmental corrosion. The facility has an installed production capacity of 1,32,000 MTPA, enabling reliable and large-scale

output to meet diverse industrial demands.

Key features

- Coating thickness gauge
- Skin pass mill (4-Hi)
- Tension leveler
- Passivation and organic coating

Pre-painted steel sheets and coils:

Pre-painted steel sheets and coils are engineered for superior quality, featuring a protective paint layer that enhances aesthetic appeal and corrosion resistance. Utilising the advanced 'two coat-two bake' technology and a wide selection of paint systems, these products deliver long-lasting durability and vibrant finishes, making them ideal for a broad spectrum of applications. The colour coating process is carried out on various substrate metals, including galvanised steel, Alu-Zinc coated steel, and aluminium.

CORPORATE GOVERNANCE REPORT

Your Company has complied with the provisions of Corporate Governance as stipulated in the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 as amended (hereinafter referred to as 'Listing Regulations').

A report on the implementation of Corporate Governance by the Company as per the Listing Regulations is given below:

1. PHILOSOPHY OF THE COMPANY ON CORPORATE GOVERNANCE

The Company's philosophy on Corporate Governance is to ensure adoption of highest standard of ethics, sound business decisions, prudent financial management practices, professionalism in decision making and conducting the business and compliance with regulatory guidelines on Corporate Governance. The Company has adopted the principles of good Corporate Governance and is committed to adopt best relevant practices for governance to achieve the highest level of transparency and accountability in all its interactions with its stakeholders including shareholders, employees, lenders and the Government. As such the Company aims at always remaining progressive, competent and trustworthy, creating and enhancing value of stakeholders and customers to their complete satisfaction. The Company continues to focus its resources, strengths and strategies to achieve the core values of quality, trust, leadership and excellence.

The Company is compliant with the provisions of Regulations 17 to 27, and clause (b) to (i) and (t) of sub regulation (2) of Regulation 46 and paras C, D and E of Schedule V of Listing Regulations, as applicable, with regard to Corporate Governance.

2. BOARD OF DIRECTORS

COMPOSITION

The Board provides leadership and strategic guidance to the Company's management and an active, well informed and independent board brings wide range of expertise and experience to the Company's functioning and ensures highest standard of corporate governance in the Company.

The Company recognizes and embraces the benefit of having a diverse Board and accordingly competent, experienced and eminent personalities from different fields of work have been selected as members of the Board. The Board's composition is in accordance with the provisions of Section 149 of the Companies Act, 2013 (hereinafter referred to as 'Act') and Regulation 17 of Listing Regulations and has an optimum mix of Executive and Non-Executive Directors with half of the Board of the Company comprising of Independent Directors. As on 31st March, 2025, the Board of Directors of the Company comprised of 8 (Eight) Directors of whom 4 (Four) are Independent Directors (including the Chairman and one Woman Director) and 4 (Four) are Executive Directors including the Managing Director.

Kolkata - 700 001

I have conducted the secretarial audit of the compliance of applicable statutory provisions and the adherence to good corporate practices by **Manaksia Coated Metals & Industries Limited** having its Registered Office at Bikaner Building, 8/1, Lal Bazar Street, 3rd Floor, Kolkata - 700 001, West Bengal (hereinafter called the Company). Secretarial Audit was conducted in a manner that provided me a reasonable basis for evaluating the corporate conducts/statutory compliances and expressing my opinion thereon.

Based on my verification of the books, papers, minute books, forms and returns filed and other records maintained by the Company and also the information provided by the Company, its officers, agents and authorized representatives during the conduct of secretarial audit, I hereby report that in my opinion, the Company has, during the audit period covering the financial year ended 31.03.2025 complied with the statutory provisions listed hereunder and also that the Company has proper Board-processes and compliance-mechanism in place to the extent, in the manner and subject to the reporting made hereinafter.

Auditors' Responsibility

Maintenance of Secretarial Records is the responsibility of the management of the Company. My responsibility is to express an opinion on existence of adequate Board process and compliance management system, commensurate to the size of the Company, based on these secretarial records as shown to me during the said audit and also based on the information furnished to me by the officers' and the agents of the Company during the said audit.

I have followed the audit practices and processes as were appropriate to the best of my understanding to obtain

reasonable assurance about the correctness of the contents of the secretarial records. The verification was done on test basis to ensure that correct facts are reflected in secretarial records. I believe that the processes and practices, I followed, provide a reasonable basis for my opinion.

I have not verified the correctness, appropriateness and bases of financial records, books of accounts and decisions taken by the Board and by various committees of the Company during the period under scrutiny. I have checked the Board process and compliance management system to understand and to form an opinion as to whether there is an adequate system of seeking approval of respective committees of the Board, of the Board, of the members of the Company and of other authorities as per the provisions of various statutes as mentioned hereinafter.

Wherever required I have obtained the management representation about the compliance of the laws, rules and regulations and happening of events, etc.

The Compliance of the provisions of Corporate and other applicable laws, rules, regulations and standards is the responsibility of the management. My examination was limited to the verification of compliance procedures on test basis.

My report is neither an assurance as to the future viability of the Company nor of the efficacy or effectiveness or accuracy with which the management has conducted the affairs of the Company.

I report that, I have examined the books, papers, minute books, forms and returns filed and other records maintained by the Company for the financial year ended 31.03.2025 according to the provisions of (as amended) :

- (i) The Companies Act, 2013 (the Act) and the rules made there under;

Independent Auditor's Report

To
The Members
Manaksia Coated Metals & Industries Limited

Report on the audit of Standalone financial statements

Opinion

We have audited the accompanying standalone financial statements of Manaksia Coated Metals & Industries Limited ("the Company"), which comprise the Balance Sheet as at 31st March 2025, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the Standalone Financial Statements, including a summary of material accounting policy information and other explanatory information (hereinafter referred to as "the standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, and total comprehensive income (comprising of profit and other comprehensive income), changes in equity and its cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Standalone Financial Statements" section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the standalone financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the

standalone financial statements of the current period. These matters were addressed in the context of our audit of the standalone financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matters to be communicated in our report.

I) A. Key audit matter: (Capital work-in-progress):

As at March 31, 2025, the Company has reported capital work-in-progress amounting to ₹35.77 crore and temporarily suspended projects amounting to ₹32.66 crore, as disclosed in Note 3.1(a) of the financial statements. The temporarily suspended project was commenced during the financial year 2018-19 and remains incomplete and suspended as on the reporting date.

The evaluation of these balances involves significant management judgment, particularly in relation to the recoverability of costs associated with the suspended project and the timing or likelihood of its resumption.

I) B. How our audit addressed the Key Audit Matter:

Our audit procedures included the following:

- We obtained an understanding of the Company's process for monitoring capital work-in-progress and suspended projects.
- We reviewed management's assessment regarding the current status of the projects and the reasons for suspension.
- We assessed the appropriateness of capitalization of costs in accordance with the applicable accounting standards.
- We tested a sample of capitalized expenditures to verify accuracy and traced them to supporting documentation.

Based on the procedures performed, we found management's assessment and related

disclosures to be reasonable in the context of the financial statements.

II) A. Key audit matter: (Issue of Share Warrants on preferential allotment Basis):

Refer Note No. 15 (f) (2) for Equity Share Capital .During the year ended March 31, 2025, the Company issued a total of 2,07,00,000 share warrants on preferential allotment basis at a face value of ₹1 per share and a premium of ₹64 per share, aggregating to ₹134.55 crore. As per the terms of issuance, 25% of the issue price, i.e., ₹16.25 per share, amounting to ₹33.64 crore, was received as application money in January 2025.

Subsequently, on March 27, 2025, the Company made the first allotment of 52,00,000 shares upon receipt of the balance ₹48.75 per share, totaling ₹25.35 crore. The remaining 1,55,00,000 warrants are yet to be allotted, and no further money has been received against them beyond the initial 25% application amount.

The accounting for the issuance of share warrants involves significant management judgment, particularly with respect to classification as equity, timing of recognition, measurement, and compliance with regulatory and accounting requirements. Given the materiality of the transaction and complexity involved, this was considered to be a key area of focus in our audit.

II) B. How our audit addressed the Key Audit Matter:

Our audit procedures included the following:

- We obtained an understanding of the terms and conditions relating to the issuance of share warrants as per Chapter V of SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015 including those specified in board and shareholder resolutions.
- We verified the receipt of application money and allotment proceeds by tracing the amounts from the bank statements and related supporting documents.
- We reviewed the accounting treatment of share warrant transactions to assess compliance with the applicable accounting standards, including classification of equity instruments and recognition of premium amounts.
- We assessed the adequacy and appropriateness of disclosures in the financial statements

relating to the share warrant issuance and pending allotments.

Based on the procedures performed, we found management's assessment and related disclosures to be reasonable in the context of the financial statements.

Information Other than the Financial Statements and Auditor's Report thereon:

The Company's Board of Directors is responsible for the other information. The other information comprises Management Discussion and Analysis and Board's Report (but does not include the standalone financial statements and our auditor's report thereon). The Company's annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the company's annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take necessary actions, as applicable under relevant laws and regulations.

Management's and Board of Directors' Responsibilities for the Standalone Financial Statements

The accompanying standalone financial statements have been approved by the company's Board of Directors. The Company's Board of Directors are responsible for the matters stated in section 134(5) of the Act with respect to the preparation and presentation of these Standalone financial statements that give a true and fair view of the financial position, financial performance including Other Comprehensive Income, Changes in Equity and Cash Flows of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies;

making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of standalone financial statements that gives a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, Board of Directors is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The Board of Directors are also responsible for overseeing the company's financial reporting process.

Auditor's Responsibilities for the Audit of Standalone Financial Statements

Our objectives are to obtain reasonable assurance about whether the Standalone financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with Standards on Auditing specified under section 143(10) of the Act, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act we are also responsible for expressing our opinion on whether the company has adequate internal

- financial controls with reference to standalone financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors.
- Conclude on the appropriateness of Board of Directors' use of the going concern basis of accounting in preparation of standalone financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the Standalone financial statements, including the disclosures, and whether the Standalone financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Emphasis of Matters

We draw attention to Note Nos. 8, 11, 17 and 23 to the financial statements in relation to outstanding balances of trade receivables, Loans & Advances given, Loans & Advances taken, Trade Payable, which are subject to confirmation.

Report on Other Legal and Regulatory Requirements

- I. As required by the Companies (Auditor's Report) Order, 2020 ("the Order") issued by the Central Government of India in terms of sub-section (11) of Section 143 of the Companies Act, 2013, we give in the "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order, to the extent applicable.
- II. As required by Section 143(3) of the Act, we report that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit.
 - b. In our opinion proper books of account as required by law have been kept by the Company so far as it appears from our examination of those books.
 - c. The Standalone Balance Sheet, the standalone Statement of Profit and Loss (including Other Comprehensive Income), the standalone Statement of Changes in Equity and the standalone Statements of Cash Flows dealt with by this report are in agreement with the books of account.
 - d. In our opinion, the aforesaid standalone financial statements comply with the Indian Accounting Standards specified under section 133 of the Act.

 - f. With respect to the adequacy of the internal financial controls with reference to standalone financial statements of the company over financial reporting of the Company and the operating effectiveness of such controls, refer to our separate Report in "Annexure B".
 - g. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us:
 - i. The company has disclosed the impact of pending litigations as at 31st March 2025, on its financial position in its financial statements (Refer Note 36 of the standalone financial statements).
 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
 - iv. (a) The Management has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall:
 - Directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of Company or
 - Provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.
 - (b) The management has represented, that, to the best of its knowledge and belief, no funds have been received by the company from any persons or entities including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall:
 - Directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of the funding party or
 - Provide any guarantee, security or the like form or on behalf of the Ultimate Beneficiaries; and
 - (c) Based on such audit procedures as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that

representations under sub clause (a) and (b) contain any material mis-statement.

- v. The dividend declared and paid during the year by the company are in compliance with section 123 of the Act.
- vi. Based on our examination, which included test checks, the Company has used accounting software for maintaining its books of account for the financial year ended March 31, 2025 which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in

the software. Further, during the course of our audit we did not come across any instance of the audit trail feature being tampered with.

III. With respect to the matter to be included in the Auditor's report under section 197(16) of the Act:

In our opinion and according to the information and explanations given to us, the remuneration paid by the company to its directors during the current year is in accordance with the provision of section 197 of the act. The remuneration paid to any director is not in excess of the limit, laid down under section 197 of the act.

Annexure -A to the Auditors' Report

The Annexure referred to in Independent Auditor's Report to the members of the company on the Standalone financial statement of Manaksia Coated Metals & Industries Limited for the year ended on March 31, 2025. We report that:

- i. (a) A. The Company has maintained proper records showing full particulars, including quantitative details and situation of Property, Plant and equipment.
- B. The company does not have any intangible assets; therefore, the clause is not applicable.
- (b) According to the information and explanation given to us and on the basis of our examination of the record of the company, the Company has a regular program of physical verification of its Property, plant and equipment by which all property, plant and equipment are verified in a phased manner over a period of three years. In accordance with this program, certain property, plant and equipment were verified during the year and no material discrepancies were noticed on such verification. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.
- (c) According to information and explanation given to us and on the basis of our examination of the records of the Company, the title deeds of immovable properties (Other than immovable properties where the company is lessee and the lease agreements are duly executed in favour of the lessee) disclosed in the standalone financial statements are held in the name of the Company.

- ii. a) The inventory has been physically verified by the management during the year. In our opinion, the frequency of such verification is reasonable and procedures and coverage as followed by management were appropriate. No discrepancies were noticed on verification between the physical stocks and the book record that were 10% or more in the aggregate for each class of inventory.
- b) According to information and explanation given to us and on the basis of our examination of the records of the company, the company has been sanctioned working capital limits in excess of five crore rupees, in aggregate, from banks on the basis of security of current assets. The quarterly returns or statements filed by the company with such banks are in agreement with the books of the company.
- iii. According to the information and explanation given to us and on the basis of our examination of the record of the company, the Company has not made any investments, provided guarantee or security or granted any advances in the nature of loans, secured or unsecured, to companies, firms, limited liability partnership or any other parties during the year. The company has balances standing as loans given to three companies, details of the loans are stated in sub clause (a) below.
 - a) A. Based on the audit procedures carried on by us and as per the information and explanations given to us, the outstanding balance at balance sheet date is Rs. 445.34 lakhs with respect to such loans or advances and guarantees or securities to subsidiaries, joint venture & associates.
 - B. Based on the audit procedures carried on by us and as per the information and explanations given to us, the outstanding balance at balance sheet date is Rs. 25.51 lakhs with respect to such loans or advances and guarantees or securities to parties other than subsidiaries, joint venture & associates.
 - b) According to the information and explanation given to us and based on the audit procedures conducted

by us, we are of the opinion that the terms and conditions of the loans given are prima facie, not prejudicial to the interest of the company.

- c) According to the information and explanation given to us and on the basis of our examination of the records of the company, in the case of loans given, the repayment of principal and payment of interest has been stipulated and the repayments or receipts have been regular.
 - d) According to the information and explanation given to us and on the basis of our examination of the records of the company, there is no overdue amount for more than ninety days in respect of loans given.
 - e) According to the information and explanation given to us and on the basis of our examination of the record of the company, there are no instances of loans given falling due during the year, which has been renewed or extended during the year.
 - f) According to the information and explanation given to us and on the basis of our examination of the record of the company, the company has not given any loans either repayable on demand or without specifying any terms or period of repayment.
- (iv) According to the information and explanation given to us and on the basis of our examination of the records the company has not given any loans or provided any guarantee or security as specified under section 185 of the companies Act, 2013 and the company has not provided any guarantee or security as specified under section 186 of the companies Act, 2013.

Annexure -B to the Auditors' Report

Report on the Internal Financial Controls under clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

We have audited the internal financial controls with reference to standalone financial statements of Manaksia Coated Metals & Industries Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the standalone financial statements of the Company as at and for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management and the Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to standalone financial statements on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit

of internal financial controls with reference to standalone financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to standalone financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to standalone financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control with reference to standalone financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control

with reference to financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to standalone financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to standalone financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to Financial Statements

as at and for the year ended March 31, 2025

1. Company Overview

Manaksia Coated Metals & Industries Limited ("the Company") is a public limited company incorporated in India having its registered office situated at 8/1, Lal Bazar Street, Bikaner Building, Kolkata - 700 001. The Company has its shares listed on the BSE Ltd and the National Stock Exchange of India Ltd (NSE). The Company is primarily engaged in the manufacture of Value-added secondary metal products like Galvanised Corrugated Sheets, Galvanised Plain Sheets, Colour Coated (Pre-painted) Sheets, etc. The manufacturing units of the Company are located at Kutch, Hyderabad, Guwahati and Bhopal.

2. Material Accounting Policies

I) Basis of Preparation of Standalone financial statements

(a) Statement of compliance

These Standalone financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) notified under Companies (Indian Accounting Standards) Rules, 2015 (as amended from time to time) notified under Section 133 of the Companies Act, 2013 ('Act') and other relevant provisions of the Act and guidelines issued by the Securities and Exchange Board of India ('SEBI'), as applicable.

The Standalone financial statements are authorized for issue by the Board of Directors of the Company at their meeting held on May 10, 2024."

(b) Functional and presentation currency

These Standalone financial statements are presented in Indian Rupees (Rs.), which is also the Company's functional currency. All amounts have been rounded off to the nearest lakhs, unless otherwise indicated.

(c) Basis of measurement

These financial statements are prepared under the historical cost convention on the accrual basis except for Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments).

(d) Use of estimates and judgments

The preparation of the Company's Standalone financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Estimates and underlying assumptions are reviewed on an ongoing basis. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these Standalone financial statements have been disclosed below. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. The changes in the estimates are reflected in the Standalone financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the Standalone financial statements.

II) Revenue from contract with customer

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Revenue is measured at the fair value of the consideration received or receivable, net of returns, discounts, volume rebates, and goods and service tax. The Company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Company regardless of when the payment is being made.

The specific recognition criteria described below must also be met before revenue is recognised.

Notes to Financial Statements as at and for the year ended March 31, 2025

Sale of Products

Revenue from sale of products is recognized when the Company transfers the control of goods to the customer as per the terms of contract. The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing component, non-cash considerations and consideration payable to the customer (if any). In case of domestic sales, the company believes that the control gets transferred to the customer on dispatch of the goods from the factory and in case of exports, revenue is recognised on passage of control as per the terms of contract / incoterms.

Variable consideration in the form of volume rebates is recognised at the time of sale made to the customers and are offset against the amounts payable by them."

Contract balances

Trade receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due).

Refund Liabilities

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer. The Company updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period.

Dividend income is recognized in Statement of Profit and Loss on the date on which the Company's right to receive payment is established. Interest income is recognized using the effective interest method.

All other income are recognized on accrual basis.

III) Property, Plant & Equipment

Property, plant and equipment are stated at acquisition cost, less accumulated depreciation and accumulated impairment loss, if any. The cost of Property, Plant & Equipment comprises of its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use. Interest and other financial charges on loans borrowed specifically for acquisition of capital assets are capitalised till the start of commercial production.

Depreciation is provided on the straight line method over the estimated useful lives of assets and are in line with the requirements of Part C of Schedule II of the Companies Act, 2013. The estimated useful lives are as follows :

Building	30 Years
Plant & Equipment	10 - 20 Years
Computers	3 Years
Office Equipment	3 - 5 Years
Furniture & Fixtures	5 - 10 Years
Vehicles	8 Years

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date are classified as 'Capital Advances' under other 'Non-Current Assets' Assets and the cost of assets not put to use before such date are disclosed under 'Capital Work in Progress'.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Notes to Financial Statements as at and for the year ended March 31, 2025

IV) Intangible Assets

Intangible Assets acquired separately are measured on initial recognition at cost. Intangible Assets acquired in a business combination is valued at their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

The useful lives of Intangible Assets are assessed as either finite or indefinite.

Intangible Assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an Intangible Asset with a finite useful life are reviewed at the end of each reporting period. The amortization expense on Intangible Assets with finite lives is recognized in the Statement of Profit & Loss. The Company amortizes intangible assets over their estimated useful lives using the straight line method.

Intangible Assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit & Loss when the asset is derecognized.

V) Inventories

Inventories are valued at cost or net realisable value whichever is lower except for saleable scraps, whose cost is not identifiable, which are valued at estimated net realisable value. Closing stock has been valued on Weighted Average basis. Cost comprises expenditure incurred in the normal course of business in bringing such inventories to its location and includes, where applicable, appropriate overheads based on normal level of activity.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

VI) Financial Instruments

Initial recognition and measurement

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

Subsequent measurement

i. Non derivative financial instruments

a) Financial assets carried at amortized cost

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets

Notes to Financial Statements as at and for the year ended March 31, 2025

and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Company has made an irrevocable election for its investments which are classified as equity instruments to present the subsequent changes in fair value in other comprehensive income based on its business model.

c) Financial assets at fair value through profit or loss

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

d) Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

e) Investment in subsidiaries

Investment in subsidiaries is carried at cost in the separate financial statements.

ii. Derivative financial instruments

The Company holds derivative financial instruments such as foreign exchange forward and option contracts to mitigate the risk of changes in exchange rates on foreign currency exposures. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value through profit or loss and the resulting exchange gains or losses are included in other income.

Derecognition of financial instruments

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

VII) Fair Value Measurement

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All methods of assessing fair value result in general approximation of value, and such value may never actually be realized.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i) Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii) Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii) Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable"

VIII) Impairment

Impairment is recognized based on the following principles:

Notes to Financial Statements

as at and for the year ended March 31, 2025

Financial Assets

The Company recognizes loss allowances using the Expected Credit Loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to life time ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at life time ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in profit or loss.

Non-Financial Assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the assets carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an assets fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash- generating unit) Non- financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of reporting period.

IX) Provisions and Contingent Liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

X) Foreign Currency Transactions & Translations

The functional currency of the Company is Indian Rupee. These Financial Statements are presented in Indian Rupee (rounded off to the nearest Lacs).

Transactions in foreign currencies entered into by the company are accounted at the exchange rates prevailing on the date of the transaction. Gains & losses arising on account of realization are accounted for in the Statement of Profit & Loss.

Monetary Assets & Liabilities in foreign currency that are outstanding at the yearend are translated at the yearend exchange rates and the resultant gain/loss is accounted for in the Statement of Profit & Loss.

XI) Cash and Cash Equivalents

Cash and Cash Equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

XII) Employee Benefits

Defined Contribution Plan

The Company makes contributions towards provident fund to the regulatory authorities to a defined contribution retirement benefit plan for qualifying employees, where the Company has no further obligations. Both the employees and the Company make monthly contributions to the Provident Fund Plan equal to a specified percentage of the covered employee's salary.

Notes to Financial Statements

as at and for the year ended March 31, 2025

Defined Benefit Plan

Gratuity is paid to employees under the Payment of Gratuity Act 1972 through unfunded scheme. The Company's liability is actuarially determined using the Projected Unit Credit method at the end of the year in accordance with the provision of Ind AS 19 - Employee Benefits.

The Company recognizes the net obligation of the defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/(asset) are recognized in other comprehensive income and are not reclassified to profit or loss in subsequent periods.

The Company recognises the changes in the net defined benefit obligation like service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements and net interest expense or income, as an expense in the Statement of Profit and Loss.

Short term employee benefits are charged off at the undiscounted amount in the year in which the related services are rendered

XIII) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

XIV) Leases

Leases under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. When acquired, such assets are capitalized at fair value or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense on a straight line basis in net profit in the Statement of Profit & Loss over the lease term.

XV) Government Grants

The Company recognizes government grants only when there is reasonable assurance that the conditions attached to them shall be complied with and the grants will be received. Grants related to assets are treated as deferred income and are recognized as other income in the Statement of profit & loss on a systematic and rational basis over the useful life of the asset. Grants related to income are recognized on a systematic basis over the periods necessary to match them with the related costs which they are intended to compensate and are deducted from the expense in the statement of profit & loss.

XVI) Income Taxes

Income tax expense is recognized in the Statement of Profit & Loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in other comprehensive income. Provision for current tax is made at the current tax rates based on assessable income.

Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Financial Statements except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and

Notes to Financial Statements as at and for the year ended March 31, 2025

liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized. Deferred income taxes are not provided on the undistributed earnings of subsidiaries and branches where it is expected that the earnings of the subsidiary or branch will not be distributed in the foreseeable future. The company offsets current tax assets and current tax liabilities, where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

XVII) Earnings per Share

Basic earnings per share is computed by dividing the net profit for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

XVIII) Current and Non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

An asset is classified as current when it is:

- i) expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii) held primarily for the purpose of trading,
- iii) expected to be realised within twelve months after the reporting period, or
- iv) cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

A liability is classified as current when it is:

- i) it is expected to be settled in the normal operating cycle,
- ii) it is due to be settled within twelve months after the reporting period, or
- iii) there is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as noncurrent.

XIX) Dividend

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

XX) Rounding of Amounts

All amounts disclosed in the standalone Financial Statements and notes have been rounded off to the nearest Lacs (with two places of decimal) as per the requirement of Schedule III, unless otherwise stated.

XXI) Statement of Cash flows

Cash flows are reported using the indirect method, whereby profit for the period is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing cash flows. The cash flows from operating, investing and financing activities of the Company are segregated.

42 Capital Management

The Company's capital management is intended to create value for shareholders by facilitating the meeting of long term and short term goals of the Company.

The Company determines the amount of capital required on the basis of annual business plan coupled with long term and short term strategic investment and expansion plans. The funding needs are met through cash generated from operations and short term bank borrowings.

The Company monitors the capital structure on the basis of net debt to equity ratio and maturity profile of the overall debt portfolio of the Company. Net debt includes interest bearing borrowings less cash and cash equivalents, other bank balances and current investments.

The table below summarises the capital, net debt and net debt to equity ratio of the Company.

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

The following table represents the fair value hierarchy of Financial Assets and Financial Liabilities measured at Fair Value on a recurring basis :

Particulars	Fair Value Hierarchy Level	March 31, 2025	March 31, 2024
Financial Liability			
Other Financial Asset (Current)	Level 2	-	-

III) Financial Risk Management

In the course of its business, the Company is exposed primarily to fluctuations in foreign currency exchange rates, interest rates, equity prices, liquidity and credit risk, which may adversely impact the fair value of its financial instruments. The Company's focus is on foreseeing the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance.

a) Market Risk -

Market Risk Comprises of Foreign Currency Exchange Rate Risk, Interest Rate Risk & Equity Price Risk

i) Exchange Rate Risk

The fluctuation in foreign currency exchange rates may have a potential impact on the Statement of Profit and Loss and Equity, where any transactions are denominated in a currency other than the functional currency of the Company.

Notes to Financial Statements as at and for the year ended March 31, 2025

All amount Rs. in Lacs

The Company's Exchange Rate Risk exposure is primarily due to Trade Payables, Trade Receivables and Borrowings in the form of Buyers' Credit denominated in foreign currencies. The Company uses foreign exchange and forward contracts primarily to hedge foreign exchange exposure.

An appreciation/depreciation of the foreign currencies with respect to functional currency of the Company by 1% would result in an decrease/increase in the Company's Net Profit before Tax by approximately Rs 4.26 lakhs for the year ended March 31, 2025 (March 31, 2024 : - Rs 3.73 lakhs)

ii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company constantly monitors the credit markets and rebalances its financing strategies to achieve an optimal maturity profile and financing cost.

iii) Equity Price Risk

Equity price risk is related to change in market reference price of investments in equity securities held by the Company. The Company has made investments in its subsidiaries, hence the Company is not primarily exposed to equity price risk.

b) Liquidity Risk -

Liquidity risk refers to the risk that the Company cannot meet its financial obligations. The objective of liquidity risk management is to maintain sufficient liquidity and ensure that funds are available for use as per requirements.

The Company has obtained fund and non-fund based working capital facilities from various banks. The Company invests its surplus funds in bank fixed deposit and in mutual funds, which carry no or low market risk.

The following table shows a maturity analysis of the Company's Financial Liabilities on the basis of undiscounted contractual payments :

Particulars	March 31, 2025	March 31, 2024
One Year or less		
Borrowings	7,558.71	11,743.82
Trade Payables	23,845.40	16,441.03

More than One Year		
Borrowings	6,623.17	6,017.99
Trade Payables	-	121.97
Other Financial Liabilities	-	-

c) Credit Risk -

Credit risk is the risk of financial loss arising from counter-party failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses both the direct risk of default and the risk of deterioration of creditworthiness.

Notes to Financial Statements as at and for the year ended March 31, 2025

All amount Rs. in Lacs

Financial instruments that are subject to credit risk principally consist of Trade Receivables, Loans Receivables, Investments, Cash and Cash Equivalents and Financial Guarantees provided by the Company. None of the financial instruments of the Company result in material concentration of credit risk.

The Company has a policy of dealing only with credit worthy counter parties as a means of mitigating the risk of financial loss from defaults. The Company manages risks through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the company grants credit terms in the normal course of business.

Independent Auditor's Report

To
The Members
Manaksia Coated Metals & Industries Limited

Report on the audit of Consolidated financial statements

Opinion

We have audited the accompanying consolidated financial statements of Manaksia Coated Metals & Industries Limited ("the Holding Company") and its subsidiaries (the company and its subsidiaries together referred to as "the Group"), which comprise the Balance Sheet as at 31st March 2025, and the Statement of Profit and Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended, and notes to the Consolidated Financial Statements, including a summary of material accounting policy information and other explanatory information (hereinafter referred to as "the Consolidated financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid consolidated financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting standards prescribed under section 133 of the Act read with the companies (Indian Accounting Standard) Rules, 2015, as amended, ("Ind AS") and other Accounting Principles generally accepted in India, of the consolidated state of affairs of the Company as at 31st March, 2025, and its consolidated profit and consolidated other comprehensive income, consolidated changes in equity and its consolidated cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the "Auditor's Responsibilities for the Audit of the Consolidated Financial Statements" section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion on the consolidated financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matter described below to be the key audit matters to be communicated in our report.

I) A. Key audit matter: (Capital work-in-progress):

As at March 31, 2025, the Company has reported capital work-in-progress amounting to ₹35.77 crore and temporarily suspended projects amounting to ₹32.66 crore, as disclosed in Note 3.1(a) of the financial statements. The temporarily suspended project was commenced during the financial year 2018-19 and remains incomplete and suspended as on the reporting date.

The evaluation of these balances involves significant management judgment, particularly in relation to the recoverability of costs associated with the suspended project and the timing or likelihood of its resumption.

I) B. How our audit addressed the Key Audit Matter:

Our audit procedures included the following:

- We obtained an understanding of the Company's process for monitoring capital work-in-progress and suspended projects.
- We reviewed management's assessment regarding the current status of the projects and the reasons for suspension.
- We assessed the appropriateness of capitalization of costs in accordance with the applicable accounting standards.
- We tested a sample of capitalized expenditures to verify accuracy and traced them to supporting documentation.

Based on the procedures performed, we found management's assessment and related disclosures to be reasonable in the context of the financial statements.

II) A. Key audit matter: (Issue of Share Warrants on preferential allotment Basis):

Refer Note No. 15 (f) (2) for Equity Share Capital. During the year ended March 31, 2025, the Company issued a total of 2,07,00,000 share warrants on preferential allotment basis at a face value of ₹1 per share and a premium of ₹64 per share, aggregating to ₹134.55 crore. As per the terms of issuance, 25% of the issue price, i.e., ₹16.25 per share, amounting to ₹33.64 crore, was received as application money in January 2025.

Subsequently, on March 27, 2025, the Company made the first allotment of 52,00,000 shares upon receipt of the balance ₹48.75 per share, totaling ₹25.35 crore. The remaining 1,55,00,000 warrants are yet to be allotted, and no further money has been received against them beyond the initial 25% application amount.

The accounting for the issuance of share warrants involves significant management judgment, particularly with respect to classification as equity, timing of recognition, measurement, and compliance with regulatory and accounting requirements. Given the materiality of the transaction and complexity involved, this was considered to be a key area of focus in our audit.

II) B. How our audit addressed the Key Audit Matter:

Our audit procedures included the following:

- We obtained an understanding of the terms and conditions relating to the issuance of share warrants as per Chapter V of SEBI (Listing Obligations and Disclosure Requirements) Regulations 2015 including those specified in board and shareholder resolutions.
- We verified the receipt of application money and allotment proceeds by tracing the amounts from the bank statements and related supporting documents.
- We reviewed the accounting treatment of share warrant transactions to assess compliance with the applicable accounting standards, including classification of equity instruments and recognition of premium amounts.

- We assessed the adequacy and appropriateness of disclosures in the financial statements relating to the share warrant issuance and pending allotments.

Based on the procedures performed, we found management's assessment and related disclosures to be reasonable in the context of the financial statements.

III) A. Key audit matter: (Absence of revenue and other transactions in the subsidiaries - JPA Snacks Pvt Ltd and Manaksia International FZE)

For the year ended 31 March 2025, the consolidated financial statements record **nil revenue in JPA Snacks Pvt Ltd** and **no transactions of any kind in Manaksia International FZE**. JPA Snacks had reported operating activity in prior periods, while Manaksia International FZE remained dormant during the current year. We were the statutory auditors of JPA Snacks Pvt Ltd, whereas the financial statements of Manaksia International FZE were audited by a component auditor whose work we used for consolidation purposes.

The assertion that one subsidiary recorded no revenue and the other was entirely inactive is unusual and therefore required an elevated level of auditor attention. Our focus centered on confirming the completeness of activity, evaluating reliance on the component auditor's work, and ensuring adequate disclosure in the consolidated financial statements. Accordingly, this matter was among the most significant in our audit as it might effect the going concern of the company.

III) B. How our audit addressed the Key Audit Matter

- **Obtained an understanding of, and tested, key controls** over order processing, invoicing, and financial-statement close in JPA Snacks Pvt Ltd to confirm that operations were inactive during the year.
- **Performed analytical and substantive procedures** on JPA Snacks, including review of GST returns, bank statements, inventory movements, and cash flows up to 31 March 2025, to identify any unrecorded revenue or expenses.
- **Inspected board minutes, customer correspondence, and production-halt notifications** to corroborate management's explanation for nil revenue in JPA Snacks.

- **Evaluated the competence, independence, and scope** of the component auditor of Manaksia International FZE in accordance with SA 600, and reviewed their working-paper extracts covering revenue recognition and overall activity.
- **Performed group-level analytical procedures** on Manaksia International FZE's cash, receivable, and payable accounts to corroborate its dormant status.

Based on the procedures performed, we found management's assessment and the related disclosures to be appropriate in the context of the consolidated financial statements.

Information Other than the Financial Statements and Auditor's Report thereon:

The Company's Board of Directors is responsible for the other information. The other information comprises Management Discussion and Analysis and Board's Report (but does not include the standalone financial statements and our auditor's report thereon). The Company's annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance or conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

When we read the company's annual report, if we conclude that there is a material misstatement therein, we are required to communicate the matter to those charged with governance and take necessary actions, as applicable under relevant laws and regulations.

Managements' and Board of Directors' Responsibilities for the Consolidated Financial Statements:

The Holding Company's Board of Directors is responsible for the preparation and presentation of these consolidated financial statements in terms of the requirements of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance and consolidated cash flows, and changes in equity of the Group including its associate companies and jointly controlled entities in accordance with the accounting principles generally

accepted in India, including the Accounting Standards specified under Section 133 of the Act. The respective Board of Directors of the companies included in the Group and of its associate companies and jointly controlled entities are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Group and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and the design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring accuracy and completeness of the accounting records, relevant to the preparation and presentation of the consolidated financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error, which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective Board of Directors of the companies included in the Group and of its associate companies and jointly controlled entities are responsible for assessing the ability of the Group and of its associate companies and jointly controlled entities to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the companies included in the Group and of its associate companies and jointly controlled entities are responsible for overseeing the financial reporting process of the Group and of its associate companies and jointly controlled entities.

Auditor's Responsibilities for the Audit of Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the Consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Standards on Auditing will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Standards on Auditing specified under section 143(10) of the Act, we exercise

professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the Consolidated Financial Statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3) (i) of the Act we are also responsible for expressing our opinion on whether the company has adequate internal financial controls with reference to consolidated financial statements in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors.
- Conclude on the appropriateness of managements' use of the going concern basis of accounting in preparation of consolidated financial statements and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the ability of the Company to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance of the Holding Company and such other entities included in the consolidated financial statements of which we are the independent auditors regarding, among other

matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matters

We did not audit the financial statements/financial information of Manaksia International FZE, whose financial statements/financial information reflect total assets of ₹1,96,41,000.00 and net assets of ₹1,95,99,068.18 as at March 31, 2025, total revenue NIL, total net (loss) after tax of (₹25,51,000.00), total comprehensive income (comprising of net loss and other comprehensive income) of (₹25,51,000.00) and net cash flows amounting to NIL for the year ended on that date, as considered in the consolidated financial statements. These financial statements/financial information have been audited by other auditors whose reports have been furnished to us by the other auditors/Management, and our opinion on the consolidated financial statements insofar as it relates to the amounts and disclosures included in respect of this subsidiary, and our report in terms of sub-section (3) of Section 143 of the Act including report on Other Information insofar as it relates to the aforesaid subsidiary, is based solely on the reports of the other auditors.

Emphasis of Matters

We draw attention to Note Nos. 8, 11, 17 and 23 to the financial statements in relation to outstanding balances of trade receivables, Loans & Advances given, Loans & Advances taken, Trade Payable, which are subject to confirmation.

 - ii. The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - iii. There were no amounts which were required to be transferred to the Investor Education and Protection Fund by the Company.
 - iv. (a) The respective Managements of the holding company and its subsidiary has represented that, to the best of its knowledge and belief, no funds have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other persons or entities, including foreign entities ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall:
 - Directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of Company or
 - Provide any guarantee, security or the like to or on behalf of the Ultimate Beneficiaries.
 - (b) The respective Managements of the holding company and its subsidiary has represented, that, to the best of its knowledge and belief, no funds have been received by the company from any persons or entities including foreign entities ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the company shall:
 - Directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever ("Ultimate Beneficiaries") by or on behalf of the funding party or
 - Provide any guarantee, security or the like form or on behalf of the Ultimate Beneficiaries; and
 - (c) Based on such audit procedures as considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that representations under sub clause (a) and (b) contain any material mis-statement.

- v. The dividend declared and paid during the year by the company are in compliance with section 123 of the Act.
- vi. Based on our examination, which included test checks, the Company has used accounting software for maintaining its books of account for the financial year ended March 31, 2025 which has a feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software. Further, during the course of our audit we did not come

across any instance of the audit trail feature being tampered with.

- III. With respect to the matter to be included in the Auditor's report under section 197(16) of the Act:

In our opinion and according to the information and explanations given to us, the remuneration paid by the holding company and subsidiaries to its directors during the current year is in accordance with the provision of section 197 of the act. Annexure -B to the Auditors' Report

Report on the Internal Financial Controls under clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

We have audited the internal financial controls with reference to consolidated financial statements of Manaksia Coated Metals & Industries Limited ("the Holding Company") as of March 31, 2025 in conjunction with our audit of the consolidated Ind AS financial statements of the Company as at and for the year ended on that date.

Management's Responsibility for Internal Financial Controls

The Holding Company's Board of Directors are responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls with reference to consolidated financial statements on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit

of internal financial controls with reference to consolidated financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements were established and maintained and whether such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to financial statements included obtaining an understanding of internal financial controls with reference to financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system with reference to financial statements.

Meaning of Internal Financial Controls with reference to Financial Statements

A company's internal financial control with reference to consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control with reference to financial statements includes those

policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorization of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with reference to Financial Statements

Because of the inherent limitations of internal financial controls with reference to consolidated financial statements, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls with reference to financial statements to future periods are subject to the risk that the internal financial control with reference to consolidated financial statements may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

1. Company Overview

The consolidated financial statements comprise financial statements of Manaksia Coated Metals & Industries Limited ("the Company") and its subsidiaries (collectively, "the Group") for the year ended March 31, 2025.

Manaksia Coated Metals & Industries Limited ("the Company") is a public limited company incorporated in India having its registered office situated at 8/1, Lal Bazar Street, Bikaner Building, Kolkata - 700 001. The Company has its shares listed on the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE). The Company is primarily engaged in the manufacture of Mosquito Repellent Coils and value-added secondary metal products like Galvanised Corrugated Sheets, Galvanised Plain Sheets, Colour Coated (Pre-painted) Sheets, etc. The manufacturing units of the Company are located at Kutch, Hyderabad, Guwahati and Bhopal.

List of Subsidiaries included in the Consolidated Financial Statements are as under:

Name of Subsidiary Company	Country of Incorporation	Extent of Holding
Manaksia International FZE	United Arab Emirates	100%
JPA Snacks Private Limited	India	100%

2. Significant Accounting Policies

I) Basis of Preparation

(a) Statement of compliance

These consolidated financial statements have been prepared in accordance with the Indian Accounting Standards (Ind AS) notified by Ministry of Corporate Affairs pursuant to Section 133 of the Companies Act 2013 ("Act") read with Rule 3 of the Companies (Indian Accounting Standards) Rules, 2015, as amended. These financial statements are prepared under the historical cost convention on the accrual basis except for certain items of assets and liabilities which have been measured at their fair values.

(b) Functional and presentation currency

These Consolidated financial statements are presented in Indian Rupees (Rs.), which is also the Group's functional currency. All amounts have been rounded off to the nearest lakhs, unless otherwise indicated.

(c) Basis of measurement

The Consolidated financial statements have been prepared on historical cost convention on the accrual basis, except for the following items:

- (i) Certain financial assets and financial liabilities measured at fair value;
- ii) Assets held for sale-measured at the lower of its carrying amount and fair value less costs to sell; and
- (iii) Employee's defined benefit plan as per actuarial valuation.

Fair value is the price that would be received on the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date under current market conditions, regardless of whether that price is directly observable or estimated using another valuation technique. In determining the fair value of an asset or a liability, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date."

(d) Use of estimates and judgments

The preparation of the Group's Consolidated financial statements requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Estimates and underlying assumptions are reviewed on an ongoing basis. Uncertainty about these assumptions and estimates could result in outcomes that require a material

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

adjustment to the carrying amount of assets or liabilities affected in future periods. The application of accounting policies that require critical accounting estimates involving complex and subjective judgments and the use of assumptions in these Consolidated financial statements have been disclosed below. Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as management becomes aware of changes in circumstances surrounding the estimates. The changes in the estimates are reflected in the Consolidated financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the Consolidated financial statements.

II) Basis of Consolidation

The consolidated financial statements comprise financial statements of the Company and its Subsidiaries and have been prepared in accordance with Indian Accounting Standard for Consolidated Financial Statements (IND AS 110), prescribed under section 133 of the Companies Act, 2013 ('Act'). Control exists when the parent has power over the entity, is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over the entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. Subsidiaries are consolidated from the date control commences until the date control ceases. The Consolidated Financial Statements have been prepared on the following basis:

- i) The financial statements of the Group companies are consolidated on a line-by-line basis and intra-group balances and transactions including unrealized gain / loss from such transactions are eliminated upon consolidation.
- ii) The difference between the cost of investment in the Subsidiaries over its proportionate share in the net assets value at the time of acquisition of stake in subsidiaries is recognised in the financial statements as Goodwill or Capital Reserve as the case may be. For this purpose, the company's share of net worth is determined on the basis of the latest financial statements prior to the acquisition after making necessary adjustments for material events between the date of such financial statements and the date of respective acquisition. Capital reserve on consolidation is adjusted against Goodwill.

Changes in parents ownership interest in subsidiary that do not result in the parent losing control of the subsidiary are recognised directly in equity.

- iii) Non controlling interest in net profit/loss of the Subsidiaries for the year is identified and adjusted against income in order to arrive at the net income attributable to shareholders' of the company. Non controlling interest in net assets of the subsidiaries is identified and presented separately in Consolidated Financial Statements.
- iv) As far as possible the Consolidated Financial Statements are prepared using uniform accounting policies for like transactions and other events in similar circumstances and are presented in the same manner as the company's financial statements.

III) Business Combination

Business combinations are accounted for using the acquisition method. The cost of an acquisition is measured as the aggregate of the consideration transferred measured at acquisition date fair value and the amount of any non-controlling interests in the acquire. For each business combination, the Group elects whether to measure the non-controlling interests in the acquire at fair value or at the proportionate share of the acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their acquisition date fair values. For this purpose, the liabilities assumed include contingent liabilities representing present obligation and they are measured at their acquisition fair values irrespective of the fact that outflow of resources embodying economic benefits is not probable.

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts by the acquiree.

If the business combination is achieved in stages, any previously held equity interest is re-measured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or OCI, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests, and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in OCI and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

IV) Revenue from contract with customer

Revenue from contracts with customers is recognised when control of the goods or services are transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for those goods or services. Revenue is measured at the fair value of the consideration received or receivable, net of returns, discounts, volume rebates, and goods and service tax. The Company recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the Company regardless of when the payment is being made.

The specific recognition criteria described below must also be met before revenue is recognised.

Sale of Products

Revenue from sale of products is recognized when the Company transfers the control of goods to the customer as per the terms of contract. The Company considers whether there are other promises in the contract that are separate performance obligations to which a portion of the transaction price needs to be allocated. In determining the transaction price, the Company considers the effects of variable consideration, the existence of significant financing component, non-cash considerations and consideration payable to the customer (if any). In case of domestic sales, the company believes that the control gets transferred to the customer on dispatch of the goods from the factory and in case of exports, revenue is recognised on passage of control as per the terms of contract / incoterms.

Variable consideration in the form of volume rebates is recognised at the time of sale made to the customers and are offset against the amounts payable by them.

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

Contract Balances

Trade Receivables

A receivable represents the Company's right to an amount of consideration that is unconditional (i.e., only the passage of time is required before payment of the consideration is due).

Refund Liabilities

A refund liability is the obligation to refund some or all of the consideration received (or receivable) from the customer and is measured at the amount the Company ultimately expects it will have to return to the customer. The Company updates its estimates of refund liabilities (and the corresponding change in the transaction price) at the end of each reporting period.

Dividend income is recognized in Statement of Profit and Loss on the date on which the Company's right to receive payment is established. Interest income is recognized using the effective interest method.

All other income are recognized on accrual basis.

V) Property, Plant & Equipment

Property, plant and equipment are stated at acquisition cost, less accumulated depreciation and accumulated impairment loss, if any. The cost of Property, Plant & Equipment comprises of its purchase price, including import duties and other non-refundable taxes or levies and any directly attributable cost of bringing the asset to its working condition for its intended use. Interest and other financial charges on loans borrowed specifically for acquisition of capital assets are capitalised till the start of commercial production.

Depreciation is provided on the straight line method over the estimated useful lives of assets and are in line with the requirements of Part C of Schedule II of the Companies Act, 2013. The estimated useful lives are as follows :

Name of Subsidiary Company	Extent of Holding
Building	30 Years
Plant & Equipment	10 - 20 Years
Computers	3 Years
Office Equipment	3 - 5 Years
Furniture & Fixtures	5 - 10 Years
Vehicles	8 Years

Advances paid towards the acquisition of property, plant and equipment outstanding at each balance sheet date are classified as 'Capital Advances' under other 'Non-Current Assets' Assets and the cost of assets not put to use before such date are disclosed under 'Capital Work in Progress'.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

VI) Intangible Assets

Intangible Assets acquired separately are measured on initial recognition at cost. Intangible Assets acquired in a business combination is valued at their fair value at the date of acquisition. Following initial recognition, intangible assets are carried at cost less accumulated amortization and accumulated impairment losses, if any.

The useful lives of Intangible Assets are assessed as either finite or indefinite.

Intangible Assets with finite lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

an Intangible Asset with a finite useful life are reviewed at the end of each reporting period. The amortization expense on Intangible Assets with finite lives is recognized in the Statement of Profit & Loss. The Company amortizes intangible assets over their estimated useful lives using the straight line method.

Intangible Assets with indefinite useful lives are not amortized, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of Profit & Loss when the asset is derecognized.

VII) Inventories

Inventories are valued at cost or net realisable value whichever is lower except for saleable scraps, whose cost is not identifiable, which are valued at estimated net realisable value. Closing stock has been valued on Weighted Average basis. Cost comprises expenditure incurred in the normal course of business in bringing such inventories to its location and includes, where applicable, appropriate overheads based on normal level of activity.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale.

VIII) Financial Instruments

Initial recognition and measurement

The Company recognizes financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument. All financial assets and liabilities are recognized at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities, which are not at fair value through profit or loss, are added to the fair value on initial recognition. Regular way purchase and sale of financial assets are accounted for at trade date.

Subsequent measurement

i. Non derivative financial instruments

a) Financial assets carried at amortized cost

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

b) Financial assets at fair value through other comprehensive income

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. The Company has made an irrevocable election for its investments which are classified as equity instruments to present the subsequent changes in fair value in other comprehensive income based on its business model.

c) Financial assets at fair value through profit or loss

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

A financial asset which is not classified in any of the above categories are subsequently fair valued through profit or loss.

d) Financial liabilities

Financial liabilities are subsequently carried at amortized cost using the effective interest method, except for contingent consideration recognized in a business combination which is subsequently measured at fair value through profit and loss. For trade and other payables maturing within one year from the Balance Sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

e) Investment in subsidiaries

Investment in subsidiaries is carried at cost in the separate financial statements.

ii. Derivative financial instruments

The Company holds derivative financial instruments such as foreign exchange forward and option contracts to mitigate the risk of changes in exchange rates on foreign currency exposures. Such derivative financial instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value through profit or loss and the resulting exchange gains or losses are included in other income.

Derecognition of financial instruments

The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the Company's Balance Sheet when the obligation specified in the contract is discharged or cancelled or expires.

IX) Fair Value Measurement

The Company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs. All methods of assessing fair value result in general approximation of value, and such value may never actually be realized.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- i) Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- ii) Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- iii) Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

X) Impairment

Impairment is recognized based on the following principles:

Financial Assets

The Company recognizes loss allowances using the Expected Credit Loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to life time ECL. For all other financial assets, expected credit losses are measured at an amount equal to the 12 month ECL, unless there has been a significant increase in credit risk from initial recognition

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

in which case those are measured at life time ECL. The amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized is recognized as an impairment gain or loss in profit or loss.

Non-Financial Assets

Goodwill and intangible assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment, or more frequently if events or changes in circumstances indicate that they might be impaired. Other assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the assets carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an assets fair value less costs of disposal and value in use. For the purpose of assessing impairment, assets are grouped at the lowest level for which there are separately identifiable cash inflows which are largely independent of the cash inflows from other assets or groups of assets (cash-generating unit) Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at the end of reporting period.

XI) Provisions and Contingent Liabilities

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

Contingent liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle the obligation or a reliable estimate of the amount cannot be made.

XII) Foreign Currency Transactions & Translations

The functional currency of the Company is Indian Rupee. These Financial Statements are presented in Indian Rupee (rounded off to the nearest Lacs).

Transactions in foreign currencies entered into by the company are accounted at the exchange rates prevailing on the date of the transaction. Gains & losses arising on account of realization are accounted for in the Statement of Profit & Loss.

Monetary Assets & Liabilities in foreign currency that are outstanding at the yearend are translated at the yearend exchange rates and the resultant gain/loss is accounted for in the Statement of Profit & Loss.

XIII) Cash and Cash Equivalents

Cash and Cash Equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

XIV) Employee Benefits

Defined Contribution Plan

The Company makes contributions towards provident fund to the regulatory authorities to a defined contribution retirement benefit plan for qualifying employees, where the Company has no further obligations. Both the employees and the Company make monthly contributions to the Provident Fund Plan equal to a specified percentage of the covered employee's salary.

Defined Benefit Plan

Gratuity is paid to employees under the Payment of Gratuity Act 1972 through unfunded scheme. The Company's liability is actuarially determined using the Projected Unit Credit method at the end of the year in accordance with the provision of Ind AS 19 - Employee Benefits.

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

The Company recognizes the net obligation of the defined benefit plan in its balance sheet as an asset or liability. Gains and losses through re-measurements of the net defined benefit liability/(asset) are recognized in other comprehensive income and are not reclassified to profit or loss in subsequent periods.

The Company recognises the changes in the net defined benefit obligation like service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements and net interest expense or income, as an expense in the Statement of Profit and Loss.

Short term employee benefits are charged off at the undiscounted amount in the year in which the related services are rendered

XV) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

XVI) Leases

Leases under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. When acquired, such assets are capitalized at fair value or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognized as an expense on a straight line basis in net profit in the Statement of Profit & Loss over the lease term.

XVII) Government Grants

The Company recognizes government grants only when there is reasonable assurance that the conditions attached to them shall be complied with and the grants will be received. Grants related to assets are treated as deferred income and are recognized as other income in the Statement of profit & loss on a systematic and rational basis over the useful life of the asset. Grants related to income are recognized on a systematic basis over the periods necessary to match them with the related costs which they are intended to compensate and are deducted from the expense in the statement of profit & loss.

XVIII) Income Taxes

Income tax expense is recognized in the Statement of Profit & Loss except to the extent that it relates to items recognized directly in equity, in which case it is recognized in other comprehensive income. Provision for current tax is made at the current tax rates based on assessable income.

Deferred income tax assets and liabilities are recognized for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Financial Statements except when the deferred income tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profit or loss at the time of the transaction. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred income tax assets and liabilities are measured using tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date and are expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect of changes in tax rates on deferred income tax assets and liabilities is recognized as income or expense in the period that includes the enactment or the substantive enactment date. A deferred income tax asset is recognized to the extent that it is probable that future taxable profit will be available against which the deductible temporary differences and tax losses can be utilized. Deferred income taxes are not provided on the undistributed earnings of subsidiaries and branches where it is expected that the earnings of the subsidiary or branch will not be distributed in the foreseeable future. The company offsets current tax assets and current tax liabilities,

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

where it has a legally enforceable right to set off the recognized amounts and where it intends either to settle on a net basis, or to realize the asset and settle the liability simultaneously.

XIX) Earnings per Share

Basic earnings per share is computed by dividing the net profit for the period attributable to the equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

XX) Current and Non-current classification

The Company presents assets and liabilities in the Balance Sheet based on current/non-current classification.

An asset is classified as current when it is:

- i) expected to be realised or intended to be sold or consumed in the normal operating cycle,
- ii) held primarily for the purpose of trading,
- iii) expected to be realised within twelve months after the reporting period, or
- iv) cash or cash equivalents unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period."

A liability is classified as current when it is:

- i) it is expected to be settled in the normal operating cycle,
- ii) it is due to be settled within twelve months after the reporting period, or
- iii) there is no unconditional right to defer settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non-current.

Deferred tax assets and liabilities are classified as noncurrent.

XXI) Dividend

Provision is made for the amount of any dividend declared, being appropriately authorised and no longer at the discretion of the entity, on or before the end of the reporting period but not distributed at the end of the reporting period.

XXII) Rounding of Amounts

All amounts disclosed in the standalone Financial Statements and notes have been rounded off to the nearest Lacs (with two places of decimal) as per the requirement of Schedule III, unless otherwise stated.

Notes to Consolidated Financial Statements as at and for the year ended March 31, 2025

XXIII) Recent Accounting Pronouncements

On March 30, 2019 the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2019, notifying Ind AS 116 on Leases. Ind AS 116 would replace the existing leases standard Ind AS 17. The standard sets out the principles for the recognition, measurement, presentation and disclosures for both parties to a contract, i.e. the lessee and the lessor. Ind AS 116 introduces a single lease accounting model and requires a lessee to recognize assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. Currently for operating lease rentals are charged to the statement of profit and loss. The Company is currently evaluating the implications of Ind AS 116 on the financial statements. The Companies (Indian Accounting Standards) Amendment Rules, 2019 also notified amendments to the following accounting standards. The amendments would be effective from April 1, 2019.

1. Ind AS 12, Income Taxes – Appendix C on uncertainty over income tax treatments
2. Ind AS 12, Income Taxes - Accounting for Dividend Distribution Taxes
3. Ind AS 23, Borrowing Costs
4. Ind AS 28 – Investment in Associates and Joint Ventures
5. Ind AS 103 and Ind AS 111 – Business Combinations and Joint Arrangements
6. Ind AS 109 – Financial Instruments
7. Ind AS 19 – Employee Benefits

42 Capital Management

The Company's capital management is intended to create value for shareholders by facilitating the meeting of long term and short term goals of the Company.

The Company determines the amount of capital required on the basis of annual business plan coupled with long term and short term strategic investment and expansion plans. The funding needs are met through cash generated from operations and short term bank borrowings.

The Company monitors the capital structure on the basis of net debt to equity ratio and maturity profile of the overall debt portfolio of the Company. Net debt includes interest bearing borrowings less cash and cash equivalents, other bank balances and current investments.

The table below summarises the capital, net debt and net debt to equity ratio of the Company.

II) Fair Value Hierarchy

All Financial Assets & Financial Liabilities are carried at amortised cost.

Level 1 — Quoted (unadjusted) market prices in active markets for identical assets or liabilities

Level 2 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable

Level 3 — Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

The following table represents the fair value hierarchy of Financial Assets and Financial Liabilities measured at Fair Value on a recurring basis :

Particulars	Fair Value Hierarchy Level	March 31, 2025	March 31, 2024
Financial Liability			
Other Financial Asset (Current)	Level 2	0.31	-

III) Financial Risk Management

In the course of its business, the Company is exposed primarily to fluctuations in foreign currency exchange rates, interest rates, equity prices, liquidity and credit risk, which may adversely impact the fair value of its financial instruments. The Company's focus is on foreseeing the unpredictability of financial markets and seek to minimize potential adverse effects on its financial performance.

a) Market Risk -

Market Risk Comprises of Foreign Currency Exchange Rate Risk, Interest Rate Risk & Equity Price Risk

i) Exchange Rate Risk

The fluctuation in foreign currency exchange rates may have a potential impact on the Statement of Profit and Loss and Equity, where any transactions are denominated in a currency other than the functional currency of the Company.

The Company's Exchange Rate Risk exposure is primarily due to Trade Payables, Trade Receivables and Borrowings in the form of Buyers' Credit denominated in foreign currencies. The Company uses foreign exchange and forward contracts primarily to hedge foreign exchange exposure.

Notes to Consolidated Financial Statements

as at and for the year ended March 31, 2025

All amount Rs. in Lacs

An appreciation/depreciation of the foreign currencies with respect to functional currency of the Company by 1% would result in an decrease/increase in the Company's Net Profit before Tax by approximately Rs 4.26 lakhs for the year ended March 31, 2025 (March 31, 2024 : - Rs 3.73 lakhs)

ii) Interest Rate Risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company constantly monitors the credit markets and rebalances its financing strategies to achieve an optimal maturity profile and financing cost.

iii) Equity Price Risk

Equity price risk is related to change in market reference price of investments in equity securities held by the Company. The Company has made investments in its subsidiaries, hence the Company is not primarily exposed to equity price risk

b) Liquidity Risk -

Liquidity risk refers to the risk that the Company cannot meet its financial obligations. The objective of liquidity risk management is to maintain sufficient liquidity and ensure that funds are available for use as per requirements.

The Company has obtained fund and non-fund based working capital facilities from various banks. The Company invests its surplus funds in bank fixed deposit and in mutual funds, which carry no or low market risk.

The following table shows a maturity analysis of the Company's Financial Liabilities on the basis of undiscounted contractual payments :

Particulars	March 31, 2025	March 31, 2024
One Year or less		
Borrowings	7,558.71	11,743.82
Trade Payables	23,845.60	16,441.11

More than One Year		
Borrowings	6,623.17	6,018.00
Trade Payables	-	121.97
Other Financial Liabilities	-	-

c) Credit Risk -

Credit risk is the risk of financial loss arising from counter-party failure to repay or service debt according to the contractual terms or obligations. Credit risk encompasses both the direct risk of default and the risk of deterioration of creditworthiness.

Financial instruments that are subject to credit risk principally consist of Trade Receivables, Loans Receivables, Investments, Cash and Cash Equivalents and Financial Guarantees provided by the Company. None of the financial instruments of the Company result in material concentration of credit risk.

The Company has a policy of dealing only with credit worthy counter parties as a means of mitigating the risk of financial loss from defaults. The Company manages risks through credit approvals, establishing credit limits and continuously monitoring the creditworthiness of customers to which the company grants credit terms in the normal course of business.
